GUARANTEED HOSIERY

Made Especially for Us

For Men, Women and Children

Our Special Hosiery Guarantee

We Guarantee our Insured Hosiery for Men, Women and Children, if worn according to the following conditions:

We do not sell less than Six Pairs for Men and Women or Four Pairs for Children of one style, size or color to a customer. They are to be changed two or three times each week. Hosiery will always wear better if changed very frequently. If any of these Socks or Stockings wear through, or require mending, within Six Months for Men and Women or Four Months for Children, after date of purchase, we will replace each worn pair with a new pair, absolutely free of charge, if you return them to us with the Guarantee Slip, which you will find in each box of hosiery, showing date when purchased.

MEN'S WINTER UNDERWEAR

These two special styles in Men's Winter weight Shirts and Drawers are made of selected wool, mixed with fine Peruvian cotton. There is no straight thread of cotton in these garments, but a mixture of wool and cotton, called "Merino." This means the wool and cotton are carded together making an extra strong, durable yarn. With Underwear made of Merino yarn you will get almost the same effect as all wool and the garments will not shrink.

Quality First

We will never sacrifice quality to sell at a low price. In every instance, quality comes first, then the price is set, insuring you full value for every dollar. No article is a good investment regardless of how low the price, if quality is missing.

We maintain a special bureau of examiners, whose sole duty it is to investigate the quality of every article of merchandise that enters our building and if, for any reason, it does not come up to the high standard we insist must be met, that article is rejected, and not allowed to go into our stock. This is just one of the precautions we take to give you quality on every purchase.

Our Big Offer in Flat Knit Shirts and Drawers for Men. Knit from a select quality of domestic wool with sufficient cotton interwoven to give better service and to prevent shrinking when washed. These garments contain nearly two-thirds fine wool and one-third combed cotton. The double breasted and double back shirts give an extra protection to the chest when exposed to extreme cold weather. The double seat on the drawers gives an added protection where the wear is the greatest. This garment is especially suitable for those men who do a great deal of horseback riding during the winter. Being heavy weight garments they are suitable for the coldest climate and the severest winter weather.

Shirts—Double breast and back. Ribbed cuffs and tail. Three pearl button front. Mohair binding around neck and on front.

FOR the want of a bolt the automobile was ditched. For the want of a sword the battle was lost. It's the little things that count. Because we didn't have all particulars in regard to SIZES, COLORS and NUMBERS of the things wanted, we couldn't ship the full order promptly—which resulted in disappointment and annoyance for all concerned. Look out for these LITTLE THINGS—when sending your order.

IF you were to ship one chicken to the market in the city you probably would not receive therefor enough to pay the carrying charges. But send a hundred chickens and the carrying charges, per chicken, are infinitesimally small. The transportation of A FEW THINGS from us to you by parcel post, often costs more than would MANY THINGS sent by fast freight. The saving is worth considering. LARGE ORDERS MEAN RELATIVELY SMALLER CARRYING CHARGES.

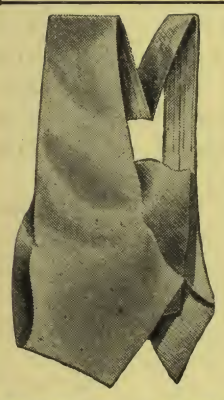
Again We Remind You of Sizes and Colors

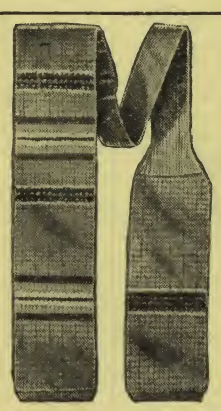
They are mighty important. We cannot properly fill your order without them.

After you have written your order, check back over it and be sure you have given us sizes and colors wherever they are necessary.



In this way you will guard against delays in filling your orders that would result if this information is not given.

Our Style Service



Our customers look to us for a certain standard of style correctness which we take great pains always to give them. They look to us for the latest and the best; and they get it.

We are so close to the originators of America's styles in New York and Paris that it is only natural that our style service should be reliable and authentic.

COLD TYPE IS a difficult means by which to carry to you a warm-blooded enthusiasm. That conditions make it necessary for us to do business at a distance, should not separate us in your mind from the sort of FLESH-AND-BLOOD PEOPLE with whom you delight to come in contact. Like men you know, we started from a humble beginning. If our business has grown big, we have NOT WANTED to grow away from our customers. Back of the cold-typed words of this book are warm-blooded, enthusiastic men—"MOST REMARKABLY LIKE YOURSELF".

Women's Gloves

How to Measure for Glove Size

Unless you know your size

Draw the tape measure over the knuckles, close but not too tight (do not include the thumb). The number of inches your hand measures indicates your glove size.

The Celebrated C. Holste & Co., Brand

Perfect in Every Detail

Actual value, $2.50. Our price only **$1.79**

Our best Real Kid Dress Glove.

35B2050—Black .....
35B2052—White .....
35B2054—Tan or Brown **$1.79**

Color, black, white and tan or brown.

Sizes, 5½ to 8, in quarter sizes. Weight, 2 ounces.

State size and color wanted.

Attractive, durable street and dress gloves. Full pique sewn. Two big pearl clasps. No better quality made—absolutely perfect fitting and are the last word in correct glove style.

Technical Expressions Used by Glove Trade

Overseam. Also called round seam, overstitched seam or cable seam; the two pieces of leather placed together flat and sewed over and over at the edges—used on better classes of imported dress kid gloves. Button hole stitch effect.

Prix Seam. Also called outseam. The two pieces of leather are placed flat one above the other and a straight seam is stitched through near the edges. Stronger thread is used than on Overseam. Used on heavier gloves or street gloves of mannish appearance, mostly domestic or English make.

Pique Seam. The edge of one piece of leather is placed so that it laps over the edge of the other piece and stitched through. Stronger than Overseam. Used on both imported and domestic gloves.

Inseam. Gloves sewed on reverse side and then turned over. Durable seams because the thread is not exposed.

Welted Seam. Same as inseam, only with leather strip running between the two pieces of leather, protecting the stitches.

English Thumb. Set in the glove in ear form like style No. 35B2138. Outseam sewn. Improved pattern which shapes the thumb better to the natural lines of the hand.

Paris Point Backs. Very popular back embroidery, three single lines of raised leather, each encircled with two or more lines of silk stitching.

Spear Point Backs. Similar to Paris Point Backs, with spear forms at head of each row. Used on better gloves only.

Tricot Weave. Used on cheaper quality silk gloves.

Milanese Weave. A closely woven pure silk fabric of wonderful uniformity and lustre—not as transparent as the Tricot Weave.

Chamois Suede. Imported fabric made in Germany from suede finished cloth. The surface is brushed off so that it perfectly resembles genuine chamo's skin, also called "Chamoisette."

Lisle. Imported fabric made either from genuine linen or the finest grades of long fibre cotton. Very light weight.

Undressed Kid (Suede). Either lamb or kid (goat) skins. Wrong side is buffed off, smoothed, dyed and used for the outside of the glove.

Mocha. Comes from Arabian Blackhead Lamb and Goat cross breed skins. The grain side is taken off in tanning and then worked down to equalize the surface, which has a very soft, velvety finish. Mocha gloves are known for their warmth, softness and durability.

Human Hair Goods and Accessories

PLEASE READ THESE HELPFUL HINTS

When ordering hair goods, send a liberal size sample, free from oil. Place in a separate envelope, pin to your order, and mark "sample" to avoid any mistake. Cut a full length sample, close to the roots, above the ears. Combings do not make good samples. State plainly whether you want sample matched in the light or dark part, or in the middle. **We prepay the charges on all of our hair goods.** Please send a generous sample, as it helps to obtain a perfect match. **Hair goods and kindred supplies for personal use** cannot be returned aften ten days from time of leaving our store, as we cannot offer for sale articles of this character which have or may have been used. This is for your protection as well as ours. We make prompt shipment of hair goods orders. It requires from 2 to 10 days to fill same depending upon shade mixture desired.

Extra Soft Special Refined Three Separate Strand Switches

914B1001—This quality is carefully selected genuine human hair, of a fine texture which is a soft and reliable quality. The stems are short, workmanship is faultless and all the hair is turned and has been through the most complete process known to insure maximum values. If you compare the quality, workmanship and rich appearance with those that you can buy elsewhere, you will find that our values are unexcelled. Each switch is mounted with silk and made under the most sanitary conditions. The great value of three separate strand switches lies in the fact that they can be used in any style of hair dressing because each switch can be worn separately if desired. The prices quoted below are for all shades except gray or white, for which we refer you to 914B1015.

Jeanne Twist

914B1003—Made of 20-inch wavy hair, braided the same as a switch. Can easily be combed out and rebraided for the back of head. This style is approved by the foremost hair dressing authorities. Price is quoted for all regular shades. Gray or white are extra shades. Send a sample and we will quote lowest possible prices.

Price, prepaid $1.90

Our Exceptional Fine Medium Quality Three Separate Strand Switches

914B1005—An exceptionally carefully selected medium quality of genuine human hair. Refined by a secret process. This quality has become very popular because at the prices we quote, it is the best value obtainable. Each switch is carefully mounted with silk mounts and small short stems. The beautiful wave that you will find in these switches, combined with the fact that it is a three separate strand switch, makes its value worth your consideration. This quality is second to our wonderful extra soft special refined quality which we highly recommend as superior to these switches. You will find that pretty coils and braid effects can be made in a stylish manner from these switches. The shades are beautiful and natural and will wear better than the average switch you can obtain at these prices.

Transformation Pompadour

The transformation pompadour is also known as transformation band switch. It is of great benefit to women with thin hair because it gives fullness entirely around the head instead of in only one place, as is the case when only an ordinary switch is worn. You can effect either a front or back pompadour head dress with this transformation.

914B1007—Made of special quality human hair, length 18 inches, wavy and mounted on durable ribbon band. Width, 13 inches from end to end. To be worn for front Pompadour, from ear to ear. We will match all shades except gray or white, which are extra shades. Send sample and we will quote lowest possible prices.

Price, Prepaid $1.48

914B1009—Same as above but 23 inch band. Covers entire crown of head. Price quoted for all shades except gray or white, which are extra shades. Send sample of extra shades and we will quote lowest price.

The Coronet Braid

914B1011—The Coronet braid is probably the most popular braid that is being used today. It produces a neat style, requires only an instant's time to put on and is made of a pair of specially arranged switches that can at any time be separated and used as separate switches. Excellent texture of refined hair is used. The braid is about 30 inches in length and weighs about 2 ounces. Gray and white are extra shades. Send us samples and we will quote lowest possible prices.

Beautiful Three Separate Strand Switches of Gray Hair

Our extra soft, special refined quality. When the hair turns gray and becomes thin, one of our three strand switches is then practically a necessity, if you would dress your hair in fashion and be well groomed. This carefully selected refined quality genuine human hair is made in a sanitary work room and mounted with silk on short stems. We would advise your buying wavy switches, because they give a much fuller appearance than straight switches.

Prices are for switches up to ¾ gray only. If you require over ¾ gray or all white send sample and state size wanted.

Rena Cluster Puffs Are Once More in Vogue

914B1019 — The Rena Cluster Puffs is one of the newest hair trimmings that is being used at the present time. Eight puffs prepared in a sort of basket effect makes an exclusive idea. Women in the style centers that are interested in the new hair dressing modes are adapting this style quickly. Made of French refined human hair, firmly fastened together on a foundation. The puffs are arranged in such a manner that you can redress them in a similar manner if they become disarranged. Send samples of gray and white and we will quote prices. Prices for all shades except gray or white.

Price, Prepaid $1.69

Handsome Single Strand Switches of Lustrous Gray Hair

We quote two qualities of single strand switches in gray hair. The demand for our gray switches has grown to such proportions in the past seasons that we are enabled to offer excellent values at prices that have heretofore been unknown. Many women in the past have refrained from buying gray hair switches owing to the expense. These are of such good quality that you will surely be pleased with them.

Prices are for switches up to ¾ gray only. If you require over ¾ gray or all white send sample and state size wanted.

Our Exceptionally Fine Medium Quality Single Strand Switches

We can recommend these switches as excellent bargains. They are well known, to practically all of our customers, as great values. In this class of goods we offer the most complete range of sizes known for the prices quoted. The grade is the next lower than our extra soft, special refined, quality. Each switch is mounted on fine silk loops on short stems. Are refined by our process which insures you clean honest value. We quote this line in wavy and straight hair switches. Unless you have a particular reason for buying a straight hair switch, we recommend that you purchase the wavy ones because they make the hair look fuller, are easier to dress and look more stylish. The illustration shows a wavy switch.

State whether you desire a straight or wavy switch.

First Quality Pure French Cut Hair Switches

First quality, pure French, cut hair switches. You will find our price range to be lower than those of other dealers. And we would call your attention to the fact that in considering the prices, remember that they are strictly pure, first quality. The sizes are extra full and that we match all shades except gray and white which are extra shades. If you require extra shades, send sample and we will quote lowest possible price. Send a long sample of your hair to get a proper match. Each switch has a silk mounting and loops, and the stems are short.

Directions for Measuring the Head

No. 1. Around the head, ... inches.

No. 2. From forehead to nape of neck, ... inches.

No. 3. From ear to ear, across forehead, ... inches.

No. 4. From ear to ear, over top of head, ... inches.

No. 5. From temple to temple, around back of head, ... inches.

Gentlemen who do not require full wig, but only top piece or toupee, will cut a piece of paper size of bald surface on top of head. Lay it on this surface and fold edges flat so that the paper will fit closely and cover bald spot completely, thus giving exact shape of head. Then draw line with pencil where hair has been parted.

Our buyers have searched the markets for the bright and sparkling, as well as the more staple or conservative patterns in woolens, that we may offer you in the following pages a choice collection of materials from which to make your selection. These smart patterns, combined with good trimmings, carefully designed styles and first class workmanship throughout, make each and every garment quoted a good investment. No matter what price you wish to pay for your clothes, you will find a garment to meet your wants. We want you to feel that in every purchase you are getting full value and more for every dollar spent than if you bought them elsewhere.

We believe you will be pleased with the arrangement of our pages this season, as we show an illustration for every suit quoted. You will also find special pages devoted to slim and stout men's suits. These suits are especially designed for their individual requirements.

Don't overlook our Serges. You will not find better values elsewhere for the prices we quote. We have been and continue to be leaders in this line.

Men's Overcoats

Here we show a wide range of fabrics and styles. Velvet collar coats are again very much in favor. We show several snappy models in a variety of materials. Many will prefer the single breasted, or double breasted convertible models, each of which we show in several new styles. Whatever your needs, you will find what you want in our complete showing.

We have added a new feature this season to several of our men's overcoat models. It is called the **E-Z-Nek-Fold.** When not in use it folds under, out of sight, but can in an instant be turned up and fastened around the neck, making an excellent protection for the throat and chest.

Boys' and Children's Department

The thoroughbred, stylish appearance of our boys' clothing appeals on sight to the ideas of every up-to-date mother; their careful, sturdy making, the splendid wear-resisting cloths and their lowness in price appeal to her practical side. We carry every latest style, and at every price.

Such details as lined pants and double stitched seams, give added life to the garment, and every mother who has bought them knows that our Indestructible clothes for boys have lessened her sewing labors, beside added purchasing power to every dollar.

The Norfolk style with knife plaits is very popular. The values are so out of the ordinary that they merit the immediate attention of every mother and father who would economize on boys' high grade clothing.

The combination suits with extra trousers are always good investments, as they really give you two suits for the price of one. A boy will usually wear out the trousers before he does the coat, so you can readily see the economy of having the extra trousers.

There are many exceptional values offered on our color page of Boys' Overcoats and Mackinaws. New fabrics, new patterns and new styles. Only the best of workmanship enters into the making of these garments.

Our Children's pages show a number of new and novel styles to select from. Among them is a handsome Velvet Suit for the little fellow. It makes an elegant dress up suit for Sunday wear. The Vestee Suits are also very much in demand.

You will not find elsewhere a better variety of styles or fabrics nor lower prices than we quote on Boys' and Children's clothes this season.

Don't forget that our rompers for the little fellows are always made full and roomy and do not bind them at any point. It is very important in these garments that they should be comfortable as well as strongly made.

A good appearance is an asset to every young man. On our pages showing the new styles for young men, we give you the chance to have that appearance at reasonable prices.

Our line never contained better looking fabrics nor snappier, up-to-the-minute models than we show this season. The garments are specially designed for young men and show all the snap and life of youth, in every line.

The quality of the fabrics used is excellent. The workmanship couldn't be better.

If you are not wearing Montgomery Ward & Co. clothes—the chances are that you don't know about them. Order today and become convinced that we are headquarters for young men's stylish clothes.

Note all the little added features in our young men's models. The smart one button coats, the athletic vests, also the smart lines of the garments, slightly following the lines of the figure, which all show style and good taste. Be among the leaders in dress this season and wear one of these up-to-the minute suits.

Young Men's Overcoats

Nor are the young men to be outdone by their elders, when it comes to Overcoats. Here again we have an extensive showing, comprising all the newest and latest ideas in both fabrics and styles, whether it is the full cut model, or the more conservative Chesterfield that strikes your fancy, we have it.

We also show dressy fur lined and fur trimmed coats for young men's wear, that are up-to-date in style and well made.

Even the youth who is growing up into young manhood will find many nobby long trouser suit styles to select from. Start right by buying your clothes of us. Once tried, you will want no other kind.

Our large list of satisfied customers is the proof of what we say.

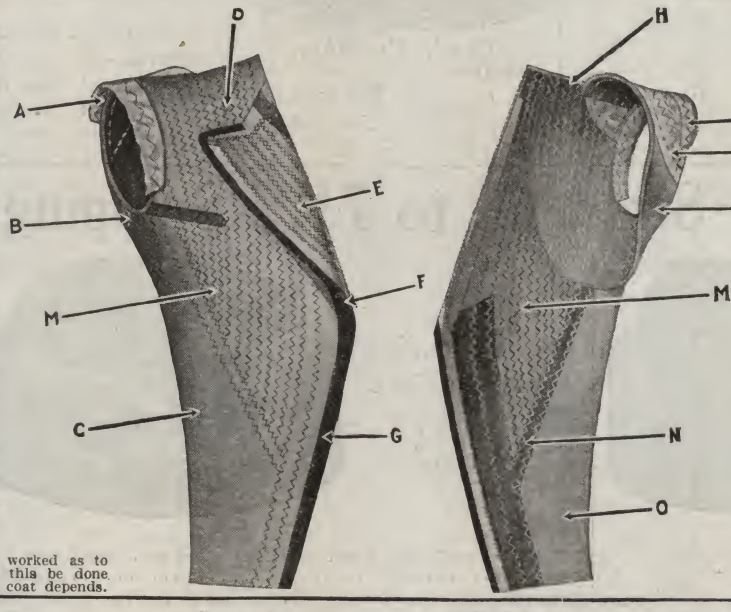
Slipons and Raincoats

The old style mackintosh is a thing of the past, and in its place we have the neat, natty, slipon. Made of double texture cloths and in the latest styles. These light weight waterproof garments are dressy in appearance and wear well. Every man should have one in his wardrobe. They are nobby and may also be worn as a top coat on clear days. Every one of our coats will give satisfactory wear. You do not have to hesitate about the selection of even the cheaper ones, as they offer good value for every dollar invested.

Raincoats are always in style and really may be termed a general utility coat. It's a top coat if the sun is shining and takes an umbrella's place if it rains. We've a full assortment. Values that never fail. Style, quality and price unequalled. Covert cloths are the newest fabrics in raincoats. Strong and good wearing.

Fur Coats

Also Fur Lined and Fur Trimmed Coats



To our already large stock of Fur Coats we have added several new styles this season, and every one can be relied on for real satisfaction.

Where we say a coat is made of selected stock it means that the fur is from the best selection, that the skins are uniform, free from blemish, have an even length of hair and show up to the best advantage. The garments from unselected stock will give just as much wear and warmth, but the garments made from the selected stock are just a little bit better in appearance.

Fur Lined Coats—We doubt if you can find elsewhere such a wide variety to select from. And, when it comes to prices, none are lower than ours for the quality of the outer shell, fur lining and trimming. Then, don't overlook the workmanship that is contained in every one of these coats.

Automobiling has increased the popularity of both Fur and Fur Lined Coats. They are the ideal winter garment for either motoring or driving.

Illustration Shows How All of Our Coats Are Constructed

Woolens will pull out of shape and style will disappear unless there is a good, substantial understructure. We use good quality haircloth and canvas.

The linings, trimmings and workmanship of our clothes combine to give good service.

No doubt you have often wondered what makes a well made coat retain its shape during service.

We illustrate and describe here, for your information, how our clothes are made.

This illustration might be termed the frame work of a coat. If it were not for this inside construction the coat could not retain its shape.

Letter A. Shows the padding which is sewed under the canvas at the shoulder to fill out and give a natural fullness. A very essential part of the coat.

Letter B. This tape is fastened across canvas to stay the strain which comes at this part of the chest.

Letter C. Shows the size of canvas used in our coats. We could save on this by putting in a small piece, but then the coat would not have the shape and style that we insist must be in every one of our garments.

Letter D. Firmly stitched and shaped canvas at shoulder which forms the foundation over which the cloth is sewed.

Letter E. Double stitched canvas which gives form to the lapel and keeps it in shape.

Letters F and G. This is a wide tape that is securely fastened to the edge of the canvas from top of lapel to bottom of coat and keeps front of coat from pulling out of shape during wear.

Letter M. Notice the stitching in the center. So worked as to give form to the garment. It is very essential that this be done right, as on it a great deal of the fit and line of the coat depends.

On this side we show the inner construction of a coat, looking at it from the inside.

Letter H. This is the haircloth which is used to stiffen the front and reinforce the canves.

Letter J. Shows another view of padding as shaped over the shoulders.

Letter K. Upper and under padding securely fastened around armhole. If this was not done the paddings would quickly work out of place and spoil the coat.

Letter L. Under felt which is used to shape out around armhole.

Letter M. Under side of canvas, showing the hollowed chest formation, keeping coat in shape when unbuttoned.

Letter N. After canvas has been worked into shape it is fastened as shown here. The tape and canvas being securely sewed together.

Letter O. Width of canvas as it extends to bottom of coat.

This illustrates to you how we construct our coats. You will agree that this is a lot of detail to follow in the making of a garment, but in order that you may have a finished coat that is correctly made and will retain its style and good looks during wear, it is necessary that we put each one through these operations. Then we can safely say to you that we will stand back of each and every garment we sell, and that our customers will be thoroughly satisfied.

Sizes:

If your chest measure is 38 inches and your waist is 33, 34, 35 or 36 inches, you wear a regular size suit.

If your waist is under 33 inches you should wear a slim size.

Or, if your chest is 38 inches and your waist is 33, 34, 35 or 36 inches, you should wear a regular suit, but if your chest is 38 inches and your waist is under 33 inches, you should wear a slim size, and if over 36 inches, a stout size.

Be sure when making your selection of a suit that you order the type of suit that will fit you.

The tables of suit sizes on the following pages show under each chest measure the **only** waist measures we can furnish with those suits. Inseam measure, in any of the lengths shown in the tables, can be furnished with any size suit shown in that table.

Gentlemen: I commenced buying goods of Montgomery Ward & Co., about the year 1880, and nothing has ever given me any greater pleasure than to study one of their catalogues and order anything I need. I have received so many things from Montgomery Ward & Co., that suited me so extra well that it is a habit of mine to keep on sending for goods. I haven't been able to buy a pair of pants of the dealers here for years that would fit me and they had to be cut and fitted to me.

This winter I sent to Montgomery Ward for a pair of pants and they fit me so well and I like them so well that I bought ten pairs of them and I intend to keep on buying until somebody puts me in the ground.

Name and address on request.

Genuine Wishbone Hanger

Did you ever stop to think why a suit or overcoat that has been hung up for some time does not fit properly when you want to wear it again? This may be traced to the fact that a hanger of imperfect construction has been used. We know of but one hanger, that will eliminate this trouble. It is the Wishbone Hanger, illustrated above. Its special design has the shape of your shoulders, holding the garment in the same shape as when worn.

To this hanger we have added a special feature of our own, giving you a place to hang trousers over. This same attachment serves to keep the garment in shape when being shipped to you.

Free—One of these Wishbone Hangers with every men's, young men's or youth's suit.

Our Work Clothing

This section of our line contains garments for the man who needs specially made clothes to work in. Whether you want mackinaw, leather, moleskin, or duck; corduroy, cottonade or whipcord in plain, blanket or sheepskin lined work clothes, you will find that we offer the best values and prices on the market today.

Men's Mackinaws. Without a doubt there is no larger variety of these popular plaid coats nor better prices elsewhere than we show. We give you an opportunity to select from various weights of fabrics and styles of garments, such as the double breasted, the Norfolks and Semi-Norfolks. There are loud plaids and those of more quiet design as well as the plain color patterns. Remember, the weight of material makes a difference in the price of the garment. We tell you exactly whether material is part wool or wool. There is nothing under cover in our statements. Where anything but wool is used, it is to strengthen the fabric and for color and does not lessen the value, but giving added strength.

Men's Work Coats. We have searched the market for work coats that we know to be made right in every detail and that we could back up with our guarantee of satisfactory service.

Many Special Features have been added to our work coats, such as extra pockets, extra pocket stays, attached collar tabs, etc., and not a cent extra added to the price of the coat, to you, for the added features.

Moleskin. This very tough yet pliable fabric is coming into greater demand every day. Has not the stiffness of duck and is stronger than corduroy. It is a warm, wear resisting material with a smooth surface. Considering its color, toughness of texture and durability, it is the most desirable outer material for work clothing.

Paraffine Duck. This finely woven, tough, hard finish duck has been treated with a special composition that renders it water-proof, making it an excellent material for work coats.

Work Suits. We are showing a large line of various kinds of work suits in both plain and blanket lined. Such excellent materials as black or brown duck, corduroy, moleskin or whipcord. You will surely find among these the one you want, and at a saving in price, too.

Work Trousers. Reliable workmanship, good materials and low prices, make up our showing of work trousers. You cannot go wrong on any of them. Every pair is a good value.

Rubber Surface Clothing. We handle only the best. Only a good grade of materials enter into the making. In construction we endeavor to make it, not only water-proof, but lasting as well.

Oiled Slicker, Overalls, Jackets, etc. These are reliable and perfectly waterproof. The kind that will give satisfactory service.

Overalls and Jackets. Remember in the making of these garments every detail counts. Note that many of our overalls are made with continuous reinforcements in the sides, as well as the fronts; also the number of pockets, different kinds of suspenders, number of seams, etc.

Ready-to-Wear Clothing
For Men, Young Men and Youths

Our New Fall and Winter Ready-to-Wear Clothing book, containing both illustrations of the styles and actual samples of the fabrics, is now ready and awaiting your request.

You will find in this book a finer collection of nobby, up-to-date styles, and conservative ones as well, than we have ever before shown. The best designers have been employed to give to our clothing that smart appearance that is demanded today by men who want to appear well dressed. In this large range of models you will find a style that is just suited to your taste and figure. Whether it be the three-button, regular style sack or the long roll, lapel style that strikes your fancy, we show it in a variety of models.

Of the materials, you never saw a finer or handsomer collection of both suitings and overcoatings, as well as trouserings, than is shown in this book. All the new cloths, in serges, worsteds, Cassimeres, and Cheviots are displayed for your selection. The latest colors and patterns are here shown.

Our usual high quality of workmanship is put into every garment. You will find our clothes are carefully made throughout.

This season we have added many features. For instance the E-Z NEK-FOLD attachment that is in some of our overcoat models, is an innovation and source of comfort to the wearer. A great protection when out in the wind or storm, yet easily folded out of sight when not in use.

There are special models for stout and for slim men. Don't think you are hard to fit, because in these styles of special cut you can easily be fitted.

Then remember how easy it is to order from our book. You don't have the long trips to town, or city, nor do you have to take any of your valuable time from your work. But in your leisure time in the evenings, you can make your selections, with none of the hurry and rush that a trip to town would mean.

Right now while the subject is fresh in your mind is the time to send for this handsome big book. It is waiting for your request. A postal will do.

Have Your Next Suit and Overcoat Made-to-order

This men's big, new, made-to-order book is just full of the latest, up-to-date styles that are being worn for this Fall and Winter Season by fashionably dressed men. It also contains actual samples of the fabrics, so that you may feel the finish and examine the texture of each and every pattern.

Every season finds more men having their clothes made by our made-to-measure system. We give them a perfect fit and put an individual style, that is so much desired, into the garment.

You may have the mistaken idea that you are hard to fit, because of an unusual build. There are no hard-to-fit figures where our clothes are concerned. We fit the tall, the short, the slim or stout as easily as those of regular build.

The fabrics represent weeks of search for the new and novel, as well as the more conservative patterns, in order that we may have a range of designs large enough to suit every taste, and at a price to fit every purse. They represent every known pattern of the weaver's art. No matter what your taste, you will find here a pattern that just meets your ideas.

They do not have that ordinary look. Don't think of these garments as just clothes, they are Montgomery Ward & Co., tailored-to-measure clothes. There's a difference. The trimmings are good quality, the designing is excellent and the workmanship is the usual high quality, turned out in our well equipped tailor shops.

One of the big advantages of made-to-order clothing, is that you can have your own ideas carried into the making of your suit or overcoat, as we can put any idea, other than those shown in this book, into a garment, if specified.

Satisfaction of fit is always assured. Be one of the Montgomery Ward & Co. tailored-to-measure men of your section this fall and winter. Well made, good fitting clothes are an asset to every man, and with our system, you can obtain them at reasonable prices, too.

It is the common tendency to put off ordering clothes until the last minute. **Don't delay!** Write for this made-to-order book now, today, have your clothes made-to-order for your individual figure, and have them when you need them.

We Do Business Differently from Most Concerns

We do not send out agents who talk and spend money. We do not extend credit, and we do not sell trash. The result is that we do not have to ask as much for our wares as other establishments. We don't mean to say that it costs us nothing to do business; it does. **But,** we have cut down all the unnecessary selling expenses usually connected with the sale of goods. We make these savings and turn them over to you by making you the lowest prices possible. All we want is a fair, living profit.

Our volume makes additional savings possible, because quantity orders, such as we are able to place, give us a margin which would not otherwise be possible.

If We Do Not Please You—Make a Fuss About It Right Away

It is unusual for anyone to ask others to tell them of their own shortcomings; but ours is an unusual business. Our principles of doing business are different, too. Our business depends almost entirely on satisfying customers whom we never see. In buying things by mail, you must have confidence in the house you are dealing with. Also, you should give us a chance to square things if everything does not suit you. It is the only way we can make sure that we have fully satisfied you. We want to do everything that is fair; you can help us do this if you will let us know promptly if anything does go wrong.

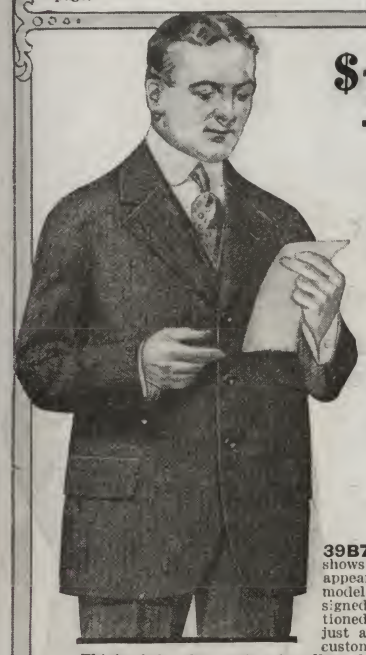
Special Suits for Stout Men who are hard-to-fit



As a man becomes stouter, he requires a coat that is made a trifle shorter in the sleeves, and a trifle shorter in length, but fuller in front, in order that it will fit him. So with the vest, which should be fuller in front, and a trifle shorter in length. The trousers need more room in the thigh and seat; also more fullness in the waist. These are all points which we have taken care of in making, resulting in our scale of extra sizes for stout men, and especially made and designed clothes to fit the portly or out of the ordinary figure.

There are no hard-to-fit figures with us. The man of sloping shoulder, and large waist can be fitted in one of our stout suits as easily as a man of regular build is fitted in a suit of his size.

Gondola Venetian Lining

39B761 — The picture shows how well stout men appear, when wearing this model. It is especially designed for large proportioned men. We fit you just as easy, as we do our customers of regular build.

Think of the above price, for all wool finely woven worsted. All season weight, nice dark blue shade, with fine self stripe pattern formed by a change in the weave. There are no better fabrics made than worsteds for excellent wear, fine appearance, and shape retaining qualities. Well tailored, three button, notch collar, sack coat. Gondola Venetian lining, guaranteed for one year from date of purchase. Vest made five button model. Full cut trousers, strongly sewed. Have side, watch and hip pockets; also belt loops. Average weight, about 3¾ pounds. **Stout sizes.** See scale at bottom of this page.

$11.50
Durable Dark Brown Worsted
As shown in illustration

39B757—Men who are stout need especially firmly woven fabrics. In this number we offer a hard finish, heavy weight durable worsted. About 55 per cent wool. Dark brown color with darker brown indistinct stripes; also corded self stripes, making a very pleasing pattern. Fashionable, three button notch collar sack coat. Lined with Gondola Venetian, guaranteed for one year from date of purchase. Up-to-date five button vest. Dressy trousers, made for comfort. Have usual side, watch and hip pockets. Belt loops. Average weight, about 4 pounds. **Stout sizes,** see scale at bottom of this page.

Famous Gray Wool (Vigoreaux) Serge
Style As shown in illustration

39B773 — We can only speak in the highest terms of this excellent quality Vigoreaux Serge. All wool. Color dark gray. Firmly woven texture, that will stand the hardest wear. A very dressy suit for stout men's use. Nobby three button coat, specially designed for stout men who consider themselves hard to fit. Well lined with wool serge, and fine workmanship throughout. A five button style vest, usual pockets. Well made trousers, cut full. Wide bottom hem which may be turned up and worn cuff style if desired. Regular pockets. Belt loops. Average weight, about 3⅝ pounds. **Stout sizes.** See scale at bottom of this page.

$14.95
Fall and Winter Weight All Wool Blue Serge

39B769—A specially designed suit for stout men. Correctly cut and correctly styled to insure perfection of fit for generously proportioned men. We have kept in mind the fact, that stout men's clothes must be extra well sewed throughout on account of the extra strain on them during wear.

Material is a high-grade all wool serge. Blue in color. Very finely woven. Tailored nicely. Durable, and an extremely good value. There is not a dressier fabric for stout men's wear than this handsome serge. Both the color and weave have a tendency to make you look less stout.

As shown, a neat single breasted style coat, three buttons. Medium width lapels. Durably lined.

Five button vest. Four pockets, one has pencil or fountain pen section.

Trousers cut full and comfortable. Extra well sewed. Usual side, watch and hip pockets, one hip pocket has tab and button. Wide bottom hem to turn up and shorten for cuffs if desired. Average weight, about 3⅝ pounds. **Stout sizes.** See scale at bottom of this page.

Average weight, about 3¾ pounds. **Stout sizes,** see scale at bottom of this page.

Special Design Suits for Men of Slim Build

As a man's figure becomes slimmer, he needs these slim model clothes to suit his build. The sleeves are a trifle longer. The coat is narrower in the waist and a trifle longer in length than the regular sizes. The vest is narrower and longer. The trousers must naturally be longer in the legs, narrower in the waist, higher in the rise and differently shaped in the seat.

For the men who think they're hard to fit, we make fitting easy and sure. We have made a study of the subject. We fit the tall or slender, in the best styles you'll find.

$7.45

Medium Gray Cassimere

As shown in illustration

39B841—Inexpensive and will give good wear. Not as fine material as the higher priced suits on this page, but it looks as if it was worth double the price we ask. Made of medium gray Cassimere having gray and black stripe effect, with an indistinct cross stripe. Very neat pattern. About 65 per cent wool. Dressy model three button, peaked lapel coat, a special design for slim men. Durable lining. Fine tailoring. Distinctive cut vest, six buttons. Regular pockets. Trousers shapely cut, belt loops. Left hip pocket has tab and button. An unusually good looking suit. Average weight, about 3¾ pounds. **Slim Sizes,** see scale at bottom of this page.

$8.45

Dark Brownish Cassimere

As shown in illustration

39B843—Here's one of our very latest styles for slim men. Will be a popular model for Fall. Of course, it isn't as fine grade cloth as used in our higher grade garments, but it is made over the same patterns. Will give good service and presents a striking appearance. Medium weight Cassimere. Finely woven, about 55 per cent wool. A combination design of plain brown and black, the brown predominating, making a fine diagonal pattern. As shown a three button, notch collar coat. Very good model for slim men. Well made and lined. Neatly made six button vest. Trousers designed for comfort, usual pockets. Belt loops. Average weight, about 3⅞ pounds. **Slim sizes,** see scale at bottom of this page.

$10.95 Dark Blue Worsted Popular this Season

Pattern as shown in illustration

39B847—Mr. Slim Man—We have considered your needs in this suit. This is not a regular model with a few inches added to it to make it fit, but a suit designed with as much care, that it shall fit and look right on your individual figure, as those made for men of regular build.

The illustration shows the easy and natural lines and its general good appearance.

Material dark blue worsted. About 60 per cent wool. Having an indistinct check of self color. The right kind of pattern for slim men's wear. Very firmly woven texture, that will wear well and retain its good looks after much service.

Exceptionally dressy three button, single breasted coat. Peaked lapel lends tone to the garment. Gondola Venetian lining. Fine tailoring throughout.

Natty six button style vest. Gondola Venetian vest back. Regular pockets.

Trousers have an individual snappy cut. Very comfortable. Have the usual pockets. Tab and button on left hip pocket. Belt loops. Average weight about 3⅝ pounds. **Slim sizes,** see scale at bottom of this page.

A Word About Mackinaws

Now we come to that good looking and serviceable garment, the Mackinaw. Mackinaws were formerly a rough garment worn by northern woodsmen to protect them from the intense cold. It was an excellent protection against cold and wind, and permitted at the same time, free movement of the limbs. These are the practical features that have made it so popular. Today it has developed into a dressy and well designed garment that is worn by the best dressers in the large cities as well as the men in the country.

HOW TO MEASURE

Take measurement over vest all around chest at arm pits.

Our Mackinaws are made to wear over a vest only and to be very full and roomy. If snug fit over vest is wanted, order one size smaller than chest measure. If you want to wear it over a sack coat or sweater, and want a loose fit, order one size larger than your actual chest measurement. For a snug fit over an undercoat, order actual size of chest over vest.

How to Take Measure for Overcoat Sizes

We require the following measurements with your Overcoat orders:

Take measurement at Chest over Vest, when standing in a natural position. Draw the tape moderately tight. Get the natural measurement as accurately as possible. Do not inflate chest when measuring. Make no allowance whatever, but send us natural measurement. This should be taken at chest and over vest just as you would for the coat of a suit. **Also give your height, weight and age.** This is very important. If you should want a loose fit, order a size larger than your natural measure. **Regular Sizes.** We can furnish chest, 35, 36, 37, 38, 39, 40, 42, 44 inches.

Men's Dressy Water-Proof Slip-on Raincoats

DETAILS OF MANUFACTURE

It will no doubt be interesting to you to learn why our slipons are superior to those of some other manufacturers of low priced garments. **We have not sacrificed quality.**

Each outer cloth is subjected to a rainproof treatment, to prevent it becoming heavy when shedding water.

STRAPPED SEAMS—Each coat has not only cemented seams but they are stitched and strapped on the inside, making them absolutely rainproof.

RUBBER COMPOUND—The rubber compound used to cement the outer and inner cloth together contains a higher percentage of "live" rubber than the majority of slip-ons sold by other manufacturers.

WATER-PROOF AND RAIN-PROOF—Our slip-ons not only are rain-proof, which means protection against an ordinary rain, but they are water-proof and you can stay out in the rain as long as you like and know that the garment will keep you dry for any length of time you care to remain outdoors.

A WORD ABOUT SLIP-ONS

In buying your slip-on you are obliged to depend upon the word of the one from whom the coat is bought with regard to the reliability, no matter whether you purchase the coat from a small dealer or from us. You have no way of determining whether the coat will give you satisfaction until you have worn it for a considerable length of time.

In buying from us you can rest assured that each and every garment has been properly treated in the rubberizing, and properly made throughout. Also, on account of the very large quantities which we sell, you can always rest assured that **our rubber compound is fresh** and has not lost a considerable portion of its waterproof qualities while lying in stock, which is a very important factor in rubber goods of any kind.

Fine Quality Fur Lined Coats

Taking Measurements

Take your measurements in the same way that you would for an overcoat; namely, measure yourself over the vest, close up under the arms, and not over the under coat. All our garments are made to fit you comfortably and are big and roomy. Don't make any more allowance than you would in ordering a regular overcoat. If you wear a size 40 coat for a suit, order a size 40 fur lined coat, it will fit you.

Sizes:
Each garment on this page can be furnished in the following sizes: 36, 38, 40, 42, 44, 46, 48 inch chest.

Fur Talk

There is one thing about a fur lined coat that you can always depend upon, and that is: wind will not penetrate furs. Consequently, for riding, driving, automobiling, etc., there is nothing that will give the elegance of appearance, the warmth and general satisfaction that a fur lined coat will. You will find every coat on this page to be a REAL value for a coat of its kind. Particular attention has been paid, first, to the standard of quality, and next to the price. Quality has not been sacrificed at the expense of simply offering you a low priced coat which might or might not give you satisfaction.

Young Men's Styles

Our young men's clothing is especially designed by men who make a study of this type of garments and know all the little features and tastes that the young men have.

These suits are cut on snugger fitting lines. The waist of coat, vest, as well as trousers, are cut a little smaller than men's suits. Altogether, these suits shown for the young fellows, have a little more of the prevailing styles than the older men's garments.

Notice the new athletic style vests, as shown at top of page. They are very comfortable and have won instant favor among the stylish young dressers.

The slanting pockets are also a new feature of the young men's suits this season. It is these little details which give our clothes the individual touch and put them in a class by themselves.

Young men, order your fall suit now and be among the first in your section to have the newest styles.

Helping Others Help Themselves

Every once in a while we get some specially strong pat on the back from some one of our many customer friends who goes to the trouble to tell us a little of his own story.

Often such a letter will end up by telling how he has succeeded—and how, incidentally, we have helped him do it.

Modesty forbids our posing as "Good Samaritans," but it is pleasing to know that we have really helped so many of our customer friends add to their savings and helped them toward independence.

The Value of Our Working Coats

It is with pride, we call your attention to the garments shown on this page. They represent our careful efforts, to secure for our customers, at all times, the best possible values, in both material and details of construction.

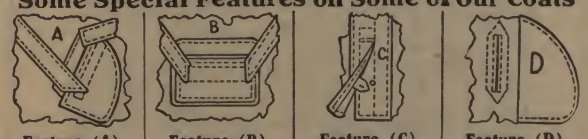
You will note many special features have been added, not only to the garments on this page, but also to some on other pages. We have designed these special features to add to the wear and comfort of the coats at no additional cost.

On all our Sheepskin and Blanket lined coats and ulsters, as well as Mackinaw Clothing, you may feel perfectly safe in selecting any garment that we illustrate. You are getting full value for your money, for each garment represents weeks of time and labor in making selections.

Take Measure Over Undercoat for Correct Size

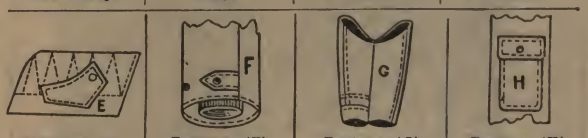
Be very careful when ordering to see that you have given us the right sizes. It will save money, time and trouble for both of us.

Always make allowances for your undercoat. This precaution, when forgotten, may result in a sheepskin lined coat being tight and uncomfortable.



While our Sheep Lined Coats are cut full and roomy, you must consider whether you want to wear them over a vest, or whether over a coat or sweater coat. Add two inches to measurement over vest, if a loose fit is wanted. Freedom of movement is important when working.

Caution—Be sure to order a size large enough.



Clipped Sheepskin

One of the most important features of some of the coats on this page, is the clipped sheepskin lining. Many people don't quite understand that short wool does not easily catch dust and dirt, or bunch up, but gives added freedom of movement. Thick, long wool pelts are required in clipping; consequently the clipped pelts are select skins.

Artificial Heat Destroys Furs

Fur Lined Coats should never be pressed. **Fur Coats** of any kind should not be hung near radiators, stoves, etc., to dry, as heat is injurious to furs. It dries out the leather in the pelt and injures it permanently.

Extra Size Fur and Fur Lined Coats

Larger sizes or lengths longer than quoted will have to be made special at an additional cost of 15 to 20 per cent over and above regular Catalogue price and will take from 3 to 4 weeks to make shipment after receipt of order.

Fur Coats

Our fur coats are all honestly described. We tell you exactly what every skin is. There are no "ifs or ands." We have built up an enviable reputation on this class of coats, and intend to keep it.

Only the best of workmanship enters into their making.

By comparison you will find our coats offer you better value for the amount you are asked to pay for them, than you will find elsewhere. Let us prove it.

We Advise Freight Shipments

Eighty per cent of our shipments are by freight. That's the way for you to save the most money. Keep track of your wants from day to day and then order in liberal quantity. Instruct us to ship by freight. *This is the reason:* A box of goods weighing about 100 pounds will be carried for 40 to 60 cents to almost any point within several hundred miles. It will cost a trifle more in some instances and as little as 25 cents to nearby points. Suppose the box contains articles for the entire family—shoes, blankets, dry goods, clothing, curtains, notions and groceries. By buying in quantity you save freight on every item. The aggregate saving will surprise you.

Now suppose you order the blankets alone to be sent by parcel post. The entire postage must be added to the cost of the blankets. Of course, you will save money on the blankets, even by parcel post; but if they are packed with other goods and sent by freight the saving will be greater.

It costs no more to ship 100 pounds by freight than it does less than 100 pounds. If you don't need enough general goods to make 100 pounds or thereabouts, a good plan is to order enough heavy groceries to bring the weight up. Say the goods you have in mind won't weigh over 30 or 40 pounds, then include a case of canned goods and a box of soap or something of the kind and you will have a fine freight shipment—one that will be profitable for you.

Many of our customers start every order with groceries and then add whatever other things they need. A case of corn or tomatoes weighs 45 pounds, a box of soap weighs 25 pounds, a box of dried fruit 25 pounds, a large can of syrup 30 pounds—all things that every family uses. From this you will see how easy it is to make up a freight order and take advantage of the low freight rates.

Try this next time you order from us and see how fine it works out.

Handsome Styles in Reliable Mantel Clocks

Doing One Thing Really Well is Our Aim

We have just one aim—that is to really serve our customers well. Sounds simple, but it doesn't work out that way—not when you have several million customers to take care of. The remarkable thing about it is that our service is constantly improving in spite of the fact that we are continually getting more customers to serve. You will be pleased with our service, our goods, and our values.

Our Leader
Genuine Seth Thomas Mantel Clock

146B6008— Price.....$5.60

Shipping weight, about 20 pounds. Height, 11 inches. Width, 18 inches.

This was chosen from a hundred or more patterns of **Seth Thomas** clocks. It is, without doubt, one of the most beautiful designs ever produced by this famous manufacturer. We have sold thousands of them—which is sufficient proof of their merit, appearance and reliability, and that the design is one that will appeal to you. This is a leader, priced at the very lowest margin of profit, in order to prove the truth of our claim that we are unrivaled in offering reliable, high class merchandise at bottom prices. A clock equal to this in appearance and timekeeping qualities, would cost $8.00 to $9.00 at retail. This clock is made of marbleized wood, in exact imitation of black onyx, with artificial Mexican onyx moulding and top, and gilt side ornaments, feet and sash. The celebrated Adamantine finish, used by the Seth Thomas Clock Co., on all their mantel clocks, is superior to all other finishes. It is harder than the finish on any other make of clocks, does not scratch easily, and needs only to be rubbed lightly with a soft cloth to restore its original rich appearance. The columns are finest grade artificial white onyx, with gilt caps and bases. The movement is a high grade, polished brass, 8-day Seth Thomas. Strikes the hours and half hours on a deep, rich toned cathedral gong. Unexcelled as a timekeeper.

Polished, Black Enameled, 8 Day Clock

Shipping weight, about 18 pounds.
Height, 12 inches. Width, 17¼ inches.

Two-toned chime strike polished black enameled clock. Six gilt columns. Gilt side ornaments, feet and sash. Mouldings are artificial green mottled Mexican onyx. **High grade eight-day movement.** An excellent timekeeper. Strikes the hours and half hours on two steel bar gongs of different pitch. Very pleasing, rich sound. 5-inch white dial, with plain Arabic numerals. Convex, or bull's eye, glass.

Highest Grade, Hand Carved, Cuckoo Clocks

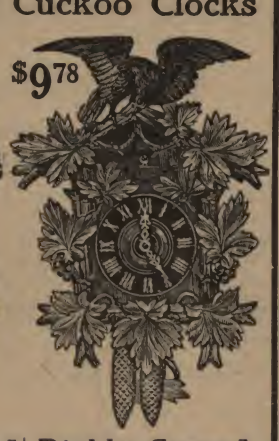
$5.23

Low Priced Cuckoo Clock

146B6022— Price.....$5.23

Shipping weight, about 16 pounds.
Height, 17¾ inches. Width, 12 inches.

Hand Carved, Walnut finish Cuckoo Clock. High grade one-day movement. A reliable timekeeper. Strikes the hours and half hours on a wire bell. The cuckoo appears at the small door near the top and calls at the stroke of the bell. Clocks of this size and grade are usually sold from $7.50 to $9.00 at retail.



$13.20

Imported Quail and Cuckoo Clock

146B6023— Price.....$13.20

Shipping weight, about 31 pounds.
Height, 25 in. Width, 14¾ in.

Case, made of hand carved walnut. Front inlaid with mahogany, ash and ebony. Diameter of dial, 6¼ inches. Finest grade one-day movement. Strikes the hours, half hours and quarter hours. The quail whistles the quarter and half hours. The cuckoo calls the full hours at each stroke of the bell. This is the best quail and cockoo clock that we offer. We have sold thousands of them and they have given perfect satisfaction.

$9.78

Richly Carved

146B6024— Price.....$9.78

Shipping weight, about 22 pounds.
Height, 19½ inches. Width, 14 inches.

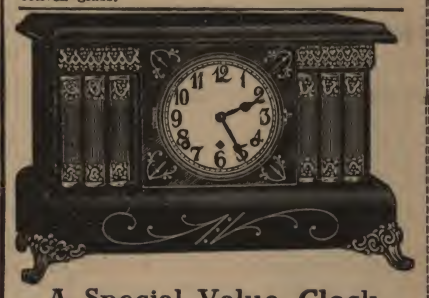
Finely carved Walnut finish, Cuckoo Clock. High grade, one-day movement. Excellent timekeeper. Strikes the hours and half hours on a wire bell, and at same time a cuckoo appears at the small door near the top and calls at each stroke of the bell. Our price is low, but the clock is equal to those sold at much higher prices, 5½-inch dark brown dial with white Roman numerals, and white hands.

Fine Mahogany Finish 8 Day, Genuine Seth Thomas Clock

146B6014— Price.....$5.17

Shipping weight, about 16 pounds.
Height, 11 inches. Width, 16 inches.

A most attractive, dark mahogany finish, Seth Thomas Clock. Highly polished. Will not scratch or become dull. Four columns look just like fine white Mexican onyx. Rich gilt-finished ornaments, feet and sash. Hard white enamel dial. Diameter of dial, 4½ inches. Plain Arabic figures. **Eight-day polished movement.** A fine timekeeper. Strikes the hours, and half hours, on a deep-toned cathedral gong. Its handsome appearance, and its excellent timekeeping qualities, make this clock an unusual value.



Richly Ornamented Mantel Clock

146B6016— Price.....$5.18

Shipping weight, about 21 pounds.
Height, 12 inches. Width, 18 inches.

Case is finely polished black enameled wood. A classic design. The eight columns have gilt metal ornaments at top and bottom. The graceful, arched top, as well as the feet, are also richly ornamented with gilt metal. Clocks imitating this in appearance have been offered by many dealers at prices considerably higher than ours. The movement is made by an American clock maker of the highest reputation, and will keep accurate time. Strikes the hours on a rich-toned cathedral gong and half hours on a cup bell. Ivory finished dial, 5 inches in diameter. Figures are very plain Arabic style. Gilt metal sash, with convex glass.

A Special Value Clock

146B6018— Price.....$3.93

Shipping weight, about 19 pounds.
Height, 11 inches. Width, 17¼ inches.

An eight-day, highly polished, black enameled clock. Has six dark green ribbed columns with gilt metal trimmings, making a very rich contrast. Sash and feet are also gilt. **Dependable, American made, 8-day movement.** Strikes the hours on a deep-toned gong and the half hours on a cup bell. Has white, ivory-like dial with large Arabic numerals. Close fitting, strong, convex glass. **Ordinarily sells for nearly double our price.**

Seth Thomas 8-Day Chime Clock

146B6020 Price

$15.96

Shipping weight, about 27 lbs.
Height, 13¼ inches. Width, 11½ inches.

The case is dark mahogany finished, highly polished. Two mahogany finished columns. Has 4½-inch silvered dial. Black Arabic figures. Gilt feet and ornaments. **Eight-day polished Movements. Has four clear, rich-toned gongs,** on which are played the famous Westminster chimes at each quarter-hour. Hours strike on equally rich-toned bell. Fitted with lever to shut off chimes when desired. A splendid grade, made by the Seth Thomas Clock Co. Will keep excellent time. Is less complicated and equal in quality to imported clocks which retail for $25.00 to $50.00. We cannot emphasize too strongly the fine quality and real value that we offer at this price.

Our "Duofold" Sofa Beds are very economical and practical

"UP AND COMING" were the clock manufacturers of the country — when it was learned that we wanted a new line of alarm clocks. Our buyers did not have a FEW CLOCKS to choose from. They saw ALL that America had to offer. And they got the lowest prices — for a record-breaking order. It is big buying that keeps our prices DOWN and our values UP — a saving in which you share.

Selected from our Large and complete Jewelry Line shown in this book

An accurate timekeeping watch is practically a necessity for every man. There is no article of wearing apparel that so well serves to give one that individual up-to-date appearance, as a high grade, tasteful looking watch, Waldemar chain and pen knife. All three pieces are in keeping with one another. They are light, strong and durable, and combine the requirements of real utility, and attractive appearance. While essentially a young man's combination, this set is tremendously popular with men of all ages. We do not know of any outfit at anything near this price, that combines the utility, beauty and good value offered here.

The Waldemar Chain

which forms part of this outfit is excellent gold filled quality. Length, 13 inches. The pattern is a pleasing combination of polished long and curb links. This is the latest and most popular style in men's watch chains. To be worn straight across the vest. Illustration shows exact size of chain.

The Watch is 16-Size, Thin Model, 20-Year Gold Filled

The feature of this outfit is an attractive, open face case, screw back and bezel, dust-proof watch. Plain polished. Ground edge crystal. The maker's guarantee that the case will be replaced free if the gold wears through within 20 years is stamped inside the back lid. For the movement, we offer your choice of the Washington 17-jewel Liberty Bell, or the Elgin or Waltham 15-jewel movements. **Guaranteed for one year against any expense for repairs.** These are all nickel movements, with jewels in settings; Breguet hair springs; patent regulators; double cut expansion balance; compensating for heat and cold; quick train; stem wind and pendant set. We engrave your monogram on the case in the attractive style shown, without extra charge.

IT is only the open mind that can close on a new idea. Because you have been in the habit of buying merchandise IN ONE WAY, is no reason why you should not learn to buy it in A NEW AND BETTER WAY. There are people who would keep your mind closed to the mail order idea—FOR THEIR OWN SELFISH ADVANTAGE. But the open mind is always looking for new ways to serve ITS OWN self-interest. This catalogue offers you a way for self-service—by offering you a way to save.

Our Catalogue is Our Only Salesman

Naturally we try to dress up this salesman attractively.

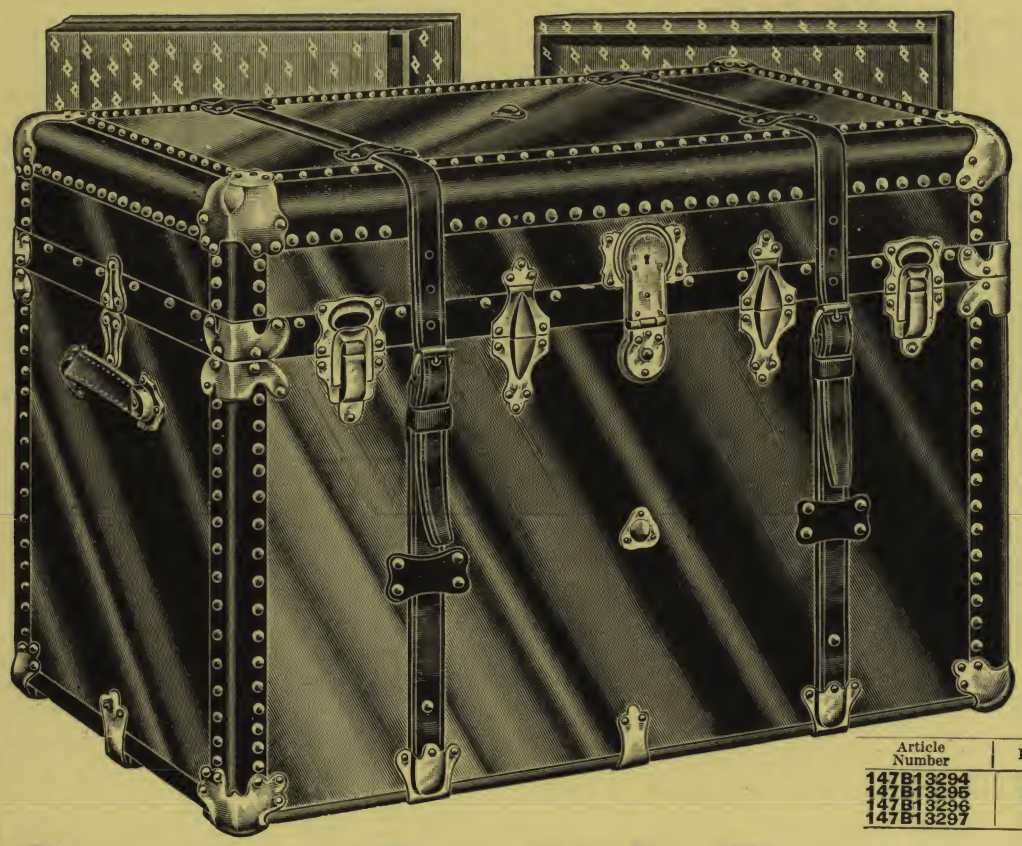
Naturally we insist that he tell you the truth.

Naturally we insist that he carry a full and complete line of all the things you will need to eat or wear or use. Naturally, too, we insist on his making it easy, simple and pleasant to order from him and get what you want.

And, finally, it is not to be wondered at that we strain every nerve to do all the things he promises, so that you will have confidence in him when you need another order.

We Can Fit You Out From Head to Foot

Not you alone, but your entire family as well. Not an article of wearing apparel that we cannot supply. With this book you can sit in the quiet of your own home and purchase a complete wardrobe.



Convenient—Yes.

But better still, it is economical. You will save from 15 per cent to 40 per cent on everything you buy. Your average saving will be fully 25 per cent. Figure the amount you spent last year for wearing apparel and you will quickly realize how great this saving will be.

And remember this applies not only to clothing, but to everything you eat or use in any way.

TIME IS JUST a little piece of eternity. And always we try to handle it as our most precious commodity. Eternally we are fighting to save time—for our customers. Four or five hours after your order is received, the chances are that it is packed and ready to ship. Ninety per cent of all orders travel on the four-hour schedule. This saving of time—for you—is the telling feature of our UNMATCHED SERVICE.

Three-Ply Canvas Bound Slatless Trunk

Round Edged Top. Two Trays. **$8.75**

Selected from our large and complete line shown in this book.

Slatless, Round Edged Trunks are in great demand at the present time. The one illustrated is, we believe, superior in style, attractiveness and durability to anything in the market at our price. It is made with a strong, three-ply wood frame covered with a firmly woven, oil painted duck. Edges and corners are bound with heavy vulcanized fibre, fastened with closely driven round head nails. Steel corner bumpers. Four valance protectors. Excelsior lock. End catches and strong dowel bolts. All trimmings are brass plated. Heavy grain cowhide straps and sliding handles. The inside is fancy lined. Fitted with covered tray and extra dress tray in center. This is a high grade, attractively finished trunk.

Elsewhere in this catalogue we quote a large variety of Dress, Wardrobe, Bureau and Steamer Trunks at prices which represent actual factory cost, with our one small profit added.

Alarm Clocks

Seth Thomas Echo Alarm Clock

46B6090—Price, $1.10
Shipping weight, about 27 ounces.

Case: Heavily nickel plated. Plain 4-inch dial with second hand and alarm indicator.

Movement: Excels any other clock of this type now on the market, both as a timekeeper and a dependable alarm. Has a loud 3½-inch gong on back. Shut-off latch by which ringing can be stopped if desired. The improved, reliable Seth Thomas Echo alarm clock is one of the best made. Can be depended upon for accurate timekeeping and alarm.

Intermittent or Long Continuous Alarm Clock

46B6092—Price, $1.06
Shipping weight, about 24 ounces.

Case: Polished nickel plated. Has 3½-inch dial.

Movement: 30 hour. Has a 3¾-inch loud gong on the back, which will awaken the soundest sleeper. An excellent timekeeper. May be made to ring continuously for about 4 minutes, or at intervals of about 20 seconds. Has a shut-off lever. Made by one of the best known American clock makers. A reliable clock and priced at a worthwhile saving.

Luminous Dial Alarm Clock

46B6094—Price, 82c
Shipping weight, about 20 ounces.

Case: Nickel plated. 3½-inch dial. Has a most practical luminous dial. Shows the time plainly in the dark. The white figures on black squares are much more distinct than the old style. Has 2⅛-inch bell, with shut-off lever.

Movement: Good, reliable one-day movement.

Chime Alarm Clock

46B6096—Price, 79c
Shipping weight, about 22 ounces.

Case: Nickel plated. Dial, 3⅝ inches.

Movement: One-day. One of the most reliable movements made and will give perfect satisfaction. The bells have a very pleasing tone and are loud enough to wake the soundest sleeper. By using the shut-off lever the ringing of the alarm may be stopped if desired.

Reliable, Small Alarm Clock

46B6098—Price, 88c
Shipping weight, about 10 ounces.

Case: Handsomely polished brass. Diameter of dial, 2 inches. Dial is white, with plain figures.

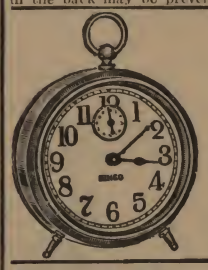
Movement: One-day. Has a loud bell. Provided with shut-off lever by which the ringing may be stopped at will. Has the alarm indicator on the dial. Having sold large numbers of this little clock, we know it to keep excellent time. A very neat, convenient clock.

Small Intermittent Alarm Clock

46B6100—Price, $1.35
Shipping weight, about 11 ounces.

An absolutely reliable alarm clock. Dial, 2 inches in diameter. Has a 1⅞-inch bell metal gong on the back which will waken the average person as surely as the ordinary large clocks. Rings insistently at short intervals until you get up and stop it by means of the shut-off lever. An excellent timekeeper, and a worth-while purchase. Our price means a good saving.

$1.88 The Startler — Eight-Day Self-Setting Alarm Clock



46B6105—Price, $1.88
Shipping weight, about 45 ounces.

Spending $2.00 or $2.50 for an alarm won't get you a better clock, couldn't, in fact, buy as good a one. The Startler is the only alarm clock sold at anywhere near this price that sets itself for another alarm the next 24 hours, without your attention.

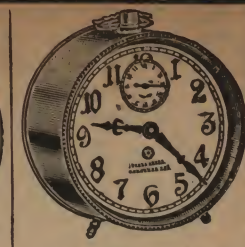
All you need to do is to wind the time and the alarm once a week and it will wake you up at the same hour every morning without any further attention.

By pushing a small button in the stem, the ringing of the alarm may be stopped. An ingenious patent device sets the alarm so it will ring 24 hours later without uncertainty or further bother. The case is heavily nickel plated, and nicely finished. Has a 4¼-inch dial with plain Arabic figures, alarm indicator and second hand, as shown in illustration. The movement has all the latest improvements and many superior features not found in other clocks. Height to top of ring, 6⅝ inches. Careful tests have proved that with regulation they will run a full week without variation. Each clock is tested for accuracy of time keeping and a positive alarm at the hour indicated. Has a 5-inch loud gong, the ringing of which may be stopped as described above, or by the use of a small lever in the back may be prevented from ringing at all.

Bingo High Grade, One-Day, Intermittent Alarm

46B6109—Price, $1.55
Shipping weight, about 37 ounces.

This is the style of clock sold by dealers everywhere for $2.00 to $2.50. The case is heavily nickel plated. Very substantially made. The large 4-inch plain dial can be easily read at a considerable distance. Height to top of ring, 6½ inches. The movement runs 30 hours with each winding. Made of the best materials, and can be regulated to keep perfect time. Has a loud, heavy 4½-inch gong on the back. The alarm will ring at intervals of 30 seconds until you get out of bed and stop the noise by the use of the shut-off lever. If it is your habit to sleep soundly and an ordinary alarm has no effect, this is just the clock you should have. No $2.50 clock, at retail, is any better in appearance or efficiency.



The Vigilant Loud Alarm

46B6112—Price, 87c
Shipping weight, about 28 ounces.

Case: Polished, nickel plated. Has a 3½-inch dial. Convex or Bull's eye glass.

Movement: 30-hour American made movement. A fine timekeeper. Has a 3⅝-inch loud gong on the back, which rings vigorously. Ringing can be stopped by use of the shut-off lever.

In spite of the low price that we ask for this clock, it is an excellent timepiece and alarm. You will find it entirely reliable.

The Celebrated Tattoo Intermittent

46B6114—Price, $1.35
Shipping weight, about 33 ounces.

Case: Polished nickel plated, with a 4-inch dial.

Movement: One-day New Haven. Highest grade. An accurate, reliable timepiece and alarm. The Tattoo has a 4-inch bell metal gong on the back which rings like a fire alarm, about every 35 seconds, 8 or 10 times, unless the alarm is stopped by using the shut-off lever. For years the Tattoo has been foremost among intermittent alarm clocks.

Rapid Fire Intermittent Alarm

46B6116—Price, 82c
Shipping weight, about 21 ounces.

Case: Nickel plated. Has 3½-inch white dial, with Roman figures.

Movement: Runs 30 hours with one winding. Easily regulated. Has shut-off latch, by which the ringing of the bell may be stopped when desired. Made by one of the oldest and most reliable American clock manufacturers. Equal to the usual $1.25 retail value.

Dependable, Nickel Plated Alarm

46B6118—Price, 63c
Shipping weight, about 19 ounces.

Dial, 3½ inches in diameter, with plain Arabic figures, easy to read. American movement. Thoroughly dependable. Good, strong alarm that can be stopped instantly by means of the shut-off lever. Although low in price, is thoroughly reliable.

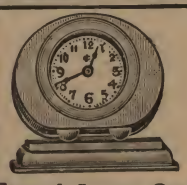
46B6119—A similar style, but an imported clock.
Each **47c**

Large Strike and Alarm Clock

46B6120—Price, $1.85
Shipping weight, about 43 ounces.

Case: Extra large, nickel plated. Stands 8¾ inches high, to top of ring. Plain 5¼-inch dial. Second hand and alarm indicator.

Movement: Reliable American make. Has shut-off button to stop alarm if desired. Not only alarms, but also strikes the hours and half hours on the 2¾-inch bell at the top.

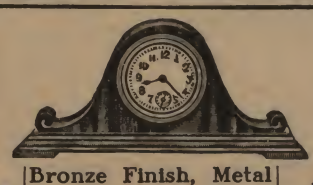


Brass Finish Alarm Clock

46B6122—Price, $1.35
Shipping weight, 31 ounces.

Case: Fine brass finish. Has 3-inch plain Arabic dial. Height, 6 inches.

Movement: One-day. Best American make. Will keep time perfectly. A reliable alarm clock of fine appearance, at an extremely low price. Looks more like a good desk clock than an alarm. Fully equal in appearance to many fancy clocks that retail at $3.00.



Small Clocks for Desk and Dresser

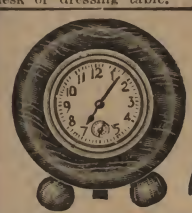
French Ivory One-Day Clock

46B6135—Price, $1.10
Shipping weight, 10 ounces.
Height, 3⅝ inches.

Has a 1¾-inch enameled dial. Case is made of white grained celluloid. Looks like real polished ivory. The movement is American make, and thoroughly reliable. Far superior to the cheap imported clocks sometimes sold at this price. Useful and artistic ornament for desk or dressing table.

Bronze Finish, Metal Case One-Day Clock

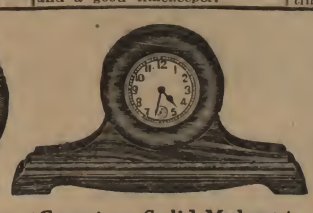
46B6138—Price, $2.40
Shipping weight, 42 ounces.
Height, 3½ inches. Width, 7⅝ inches.



Case is made of a tough composition metal. Beautifully shaded, rich, greenish bronze finish. A graceful, recent design. Greatly admired. Has 1¾-inch enameled dial. Beveled glass, with gilt sash. Dependable American movement, and a good timekeeper.

Bronze Finish, Metal Case, One-Day Clock

46B6140—Price, $1.89
Shipping weight, 20 ounces.
Height, 3⅞ inches.



Case is made of a tough metal, shaded, greenish bronze finish. Deeply moulded figure. Very rich looking. Has a 1¾-inch enameled dial. Beveled glass with gilt sash. Reliable American made movement. Not a mere ornament, but a good practical timepiece.

Mahogany Finish, One-Day Clock

46B6142—Price, $1.16
Shipping weight, 11 ounces.
Height, 4⅛ inches. Width, 3¾ inches.

Very attractive plain design. Dull mahogany finish case. Has a 1⅞-inch white dial, with plain Arabic figures. Gilt sash. Fitted with a reliable American made movement. A good timepiece, and excellent value. Makes an acceptable gift.

Each watch is carefully regulated and ready to put in your pocket. This is a very good value; in fact, a very low price for so fine a watch. We have sold many thousands of this splendid watch and confidently recommend it.

Our Special Watch Guarantee

Our Guarantee on Elgin, Waltham, Rockford, Hampden, Howard and Hamilton Watches is exactly as shown below, except it is for one year instead of three.

We sell only dependable watches, which we have tested and found will give the service that can reasonably be expected from them, according to their prices. The best values in our stock are Washington watches and with the LaFayette, Army and Navy, Senate, and Mt. Vernon grades, we issue a signed three-year watch guarantee, like shown below. We can afford to issue this ironclad Guarantee, because our system of testing and regulating watches makes certain the elimination of every watch that is not in absolutely first-class running order, and in condition for actual service.

This makes a double test—first at the factory, and afterward in our Watch and Jewelry division. Consequently, the watches which we sell almost invariably give satisfactory service from the start and, unless they meet with accident, very rarely require any repairs during the first few years of service.

The two chief characteristics of our watches, are low cost and dependable service. When you buy a watch from us, you can feel assured of not only satisfactory timekeeping service, but also of a value that is almost impossible to equal in any retail store.

Our Special Watch Guarantee

Protects you from repair expense for three years

In addition to the provisions of our General Guarantee, we specifically guarantee that Watch Movement No. ..... sold by us on date shown below, will reach purchaser in first-class running order, and will remain so for three years from date of purchase. Should any repairs become necessary within three years from date of purchase, we will make them free of cost, or replace any defective parts, provided watch is returned to us for repair. We do not pay for repairs made by outside watchmakers.

The illustration shows the Dust and Damp-Proof Winding Stem, which we furnish with all our screw bezel and solid back cases. The inside dust-proof cap screws down against a leather washer, and the winding square passes through a close-fitting steel clutch. By these means all dust and dampness are prevented from getting into the movement by way of the winding stem. As a result, the life of the watch movement is greatly lengthened, and the cost for cleaning and repairs is reduced. Cases 45B181 to 45B184 are furnished with this special feature. We recommend them as exceptionally desirable, heavy-duty cases.

We furnish above cases complete with movements at the following prices:	45B185	45B181	45B182 or 45B180	45B183	45B184

45B195 — The Famous Dueber Hampden Wm. McKinley. 16 size, Thin Model Watch. One of the most popular grades ever made by the successful Dueber-Hampden Watch Co. The movement is nickel, bridge-model as shown in illustration. Has 17 ruby and sapphire jewels in settings. Adjusted to heat and cold. Patent Breguet hair spring. Patent regulator. Handsomely damaskeened plates with highly polished plate screws. Double sunk dial with red marginal figures. Stem wind and set. As to timekeeping quality—these watches are just a shade removed from the regular railroad grades. The cases in which we fit them are the regular railroad type, the strongest cases of the weight available. They are solid Silverine. One-piece cup back and screw front. Dust and damp proof winding stems. Extra strong crystal, thin at edges and thicker in the center. The McKinley would cost at a jeweler's, $15.00 or more. Our price, postpaid $9.95

Usual Retail Price $6.00 — Stem Wind Pendant Set

Our Best Values in Men's American Watch Movements

The Watch movements described on this page are, in our estimation, the choice of the product of the best American factories. Every one represents 100 cents of value and service for every dollar you pay. The higher priced movements are, of course, more finely adjusted than the lower priced grades, and therefore keep more accurate time. But every movement described on this page is a dependable time piece which we can honestly recommend. Washington Watches are our best values. They are made according to our own specifications. From years of experience, we know them to be highly economical, seldom needing repairs. In time-keeping qualities, they cannot be surpassed at the prices we ask. The same skilled watch makers who make the Greenwich—in our estimation, the finest American Watch—also make the other grades of Washington watches.

Prices for these movements complete, with cases, will be found on the various pages of our watch section. We particularly wish to refer you to the first page of this section. Read our Watch Guarantee. It is a paid up insurance policy on the watch you purchase from us.

The Greenwich Highest-Type American Watch. A Rating Certificate with every Greenwich Sold

This is the best Washington watch ever made. We consider it about the best watch ever produced in the United States. With each Greenwich watch the purchaser receives a written certificate of rating, which shows just what the amount of variation has been for a certain period. We guarantee that it will perform up to the record. The Greenwich is a 16-Size, thin model, open face. It has 23 ruby, sapphire and diamond jewels. The balance pivots run in genuine diamond jewels. The adjustment is to six positions including isochronism and variations of temperature. Double roller escapement. Steel escape wheel. Solid gold, jewel settings. Solid gold timing screws in balance wheel. All train wheels solid gold. Beautifully damaskeened steel work, with gold lettering. Highly polished exposed steel winding wheels. Stem wind and lever set. Fine glass enameled double sunk dial. Cased in thin model, open face, screw bezel and back, dust proof, extra heavy solid gold, 14-karat gold, or 25-year gold filled cases. The cases are plain polished. We engrave any monogram lodge emblem or inscription free. If you prefer a fancy pattern, select any watch case engraving in our Catalogue and we will duplicate it free of charge. Each watch is put up in a solid mahogany box. **Three-year guarantee inclosed.**

The Washington 17-Jewel 18-Size, Liberty Bell Movement

We consider the Liberty Bell the best medium grade movement made, for the price. Has 17 jewels in settings. Double cut expansion balance, compensating for heat and cold. Patent Breguet hairspring hardened and tempered in form. Patent regulator. Patent safety pinion. Damaskeened plates. Dust ring. White enamel dial, with red marginal figures. Stem wind and lever set. We have sold these movements for years and they have proven wonderfully reliable timekeepers.

16-Size, Thin Model Liberty Bell

Has 17 jewels in settings. Double cut expansion balance, compensating for heat and cold. Breguet hairspring. Patent regulator. Fine double sunk white enamel dial, with red marginal figures. Silver damaskeen finish. Exposed, polished steel, winding wheels. Stem wind. Pendant set. Quick train. The Liberty Bell is a beauty in appearance. Its timekeeping qualities are remarkable for a medium-priced watch and we recommend it with any of the 16-Size cases, in this Catalogue.

12-Size Liberty Bell

We do not illustrate the 12-Size Liberty Bell, as it is almost identical with the 16-Size, and is exactly the same grade.

The Washington 17-Jewel 18-Size, Adjusted Senate Movement

The best popular-priced, adjusted watch in our stock. A handsomely damaskeened nickel movement with 17 selected jewels in setting. Patent regulator. Breguet hairspring. Adjusted to heat and cold. Patent safety pinion. Double sunk dial, with red marginal figures. Quick train. Stem wind, and lever set. Balance staff is hardened so that an ordinary jar or fall will not break it. Although we sell the Senate at as low a price as other 17-jewel watches, it carries our three-year guarantee.

16-Size, Thin Model Senate

Has 17 ruby and sapphire jewels, in polished settings, adjusted to heat and cold. Double cut compensation balance. Quick train. Breguet hairspring. Patent micrometer regulator. Exposed, polished steel winding wheels. Fine double sunk white enamel dial, with red marginal figures. Beautiful silver damaskeen finish. Stem wind and pendant set. This is a thoroughly reliable movement—one that can hardly be equaled at the price. **Guaranteed for three years.**

12-Size Senate

Practically the same as the 16-Size, except that it has steel escape wheel and gold center wheel. **Guaranteed for three years.**

For Complete Outfit
- **Wrist Watch with Bracelet**
- **Chatelaine Watch with Pin**
- **Regular Style Watch with Chain**

45B980—Watch, Bracelet, Chatelaine Pin, and Guard Chain, Complete in silk-lined, velvet covered case.
Postpaid **$12.95**

This new Elgin Convertible watch has been especially designed to cover all the requirements of a reliable, timekeeping bracelet watch, chatelaine watch or regular style watch. Many women like to wear a bracelet watch for some occasions, and a chatelaine watch on other occasions, but do not care to pay the price for two complete watches. This outfit supplies both watches at the usual price for one.

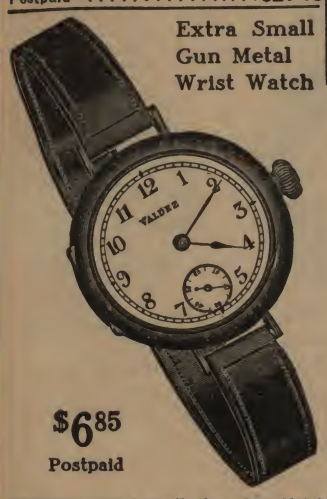
Movement—A genuine Elgin. Has back of it the time-tried and established reputation of the famous Elgin National Watch Co., as well as our own signed guarantee as to its accurate timekeeping qualities.

Case—20-year guarantee. Gold filled quality, with solid gold pendant ring and loop for bracelet, handsomely engraved back and front. Plain space on back is suited for a neat monogram, which we engrave free.

Bracelet—The finest gold filled quality. Spring expansion type. Swivel joint permits watch to be turned face up or down, without unhooking. Hooks securely to the watch, and fits closely on the wrist; can be removed instantly.

Chatelaine Pin—The popular fleur-de-lis type. Polished, gold filled, to match the watch.

Guard Chain—Length, 46 in. Fine gold filled quality. Gold soldered links. Gold front and back slide, with real chip diamond set.



Large illustration shows the exact size of watch and bracelet, just as they appear. Watch can be worn face up or down. **If you prefer a plain watch without any engraving, excepting your monogram, we furnish that style, without extra charge.** If you do not specify, we send the engraved front and back, as shown in illustration. For a graduation, birthday, or holiday gift, there is no article that will prove more acceptable. Although $25.00 is the price being asked in most retail jewelry stores, we have priced this beautiful outfit at a tremendous saving.

45B982—Same outfit as 45B980, but with 14 kt. Solid Gold Watch. **Postpaid** **$18.95**
We will furnish either of above Watches with 15-Jewel Elgin Movement, for $3.65 extra.

The Finest Grades at Wholesale Prices, with Refund Guarantee

Quality and price, are the only two arguments really worth considering in buying diamonds. Our selling prices are close to the prices which the retail jeweler **pays,** and we save you practically his entire profit. If you are not satisfied, after you have received your diamond, we do not expect you to keep it. Return it to us, and we will refund purchase price, and transportation charges.

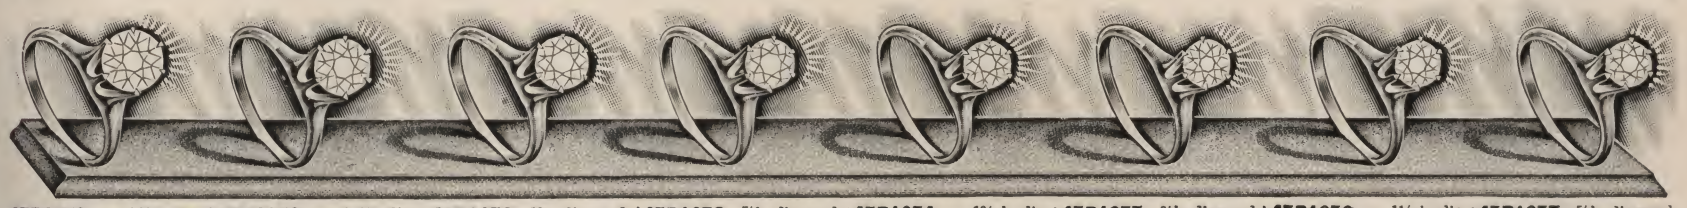
We handle three grades: **Selected quality, Fine quality** and **medium** quality. Selected quality are the pick of our stock. Beautiful color, full of fire and brilliancy, and free from all blemishes, or imperfections. They are generally called by jewelers "blue-white." Fine quality are perfectly cut, fine white, brilliant stones, about equal to the diamonds usually sold for first quality. **Medium quality** are bright, snappy stones of good color, having small imperfections which do not interfere with their brilliancy. The imperfections in our fine and medium quality diamonds are such as can be discovered only with the use of a magnifying glass. The diamonds are just as brilliant, look just as well, and for every practical purpose are as good as if absolutely perfect. Many people buy diamonds which are slightly imperfect and wear them all their lives without ever discovering that there is any imperfection. On account of the considerable difference in price, we recommend the purchase of our fine and medium qualities. They make a splendid showing for the price.

45B1144—3-16k Diamond Select. Medium height mounting.
Fine $25.00
Medium 20.25
15.25

This is an enlarged side view of one of our most popular and attractive diamond gift or engagement rings. The actual size is shown on the next page No. 45B1144. We put up this ring and all other diamond rings at $10.00 or over, in a satin lined velvet box.

As Good As Money in the Bank

is a diamond bought with our special diamond guarantee. **This guarantee is your bank book,** because under its terms, you may return for refund any single stone diamond ring, stud or scarf pin in catalogue at $10.00 or over. We do not issue this special guarantee with other diamond jewelry. But our general guarantee on inside front cover, assures you that the quality of every article is exactly as described in catalogue.



Any Combination of Diamond and Mounting

We furnish any size or quality diamond, or any mounting set with any size stone. If the mounting you like is quoted with ½k stone we can furnish with ¼k or ¾k. We take all the risk of not pleasing you. With every diamond ring at $10.00 or over, we furnish a satin lined, velvet box.

Rings Number 45B1050 to 45B1064 inclusive, have platinum tops and 14k gold bands.

Reduced Prices on Desirable Diamonds

At present, there is no market in Europe for diamonds, and we have bought some fine and medium qualities, at startling prices, which show in our great price reductions. They are really beautiful stones, full of fire and brilliancy. The fine quality are so nearly perfect that you would probably never know the difference if we did not tell you. The medium quality are almost as good. Every stone a bargain.

About Synthetic Rubies and Sapphires

About Synthetic Rubies and Sapphires. These gems are also called reconstructed rubies, and reconstructed sapphires, because they were first made by brazing together a number of small natural stones into one large stone. Scientists, by breaking up and analyzing natural rubies and sapphires, found that both were composed of the same substance, which had become crystallized through intense heat, beneath the earth's surface. After years of experiment, an oxyhydrogen furnace was invented, which produces rubies and sapphires that are exactly the same as the natural gem. The material is the same, the only difference being that artificial, instead of natural heat is used, producing the pigeon blood ruby, so-called from its rich, brilliant red color, the beautiful dark blue sapphire, or the brilliant white sapphire. These gems are not to be confused with doublets or other imitations. They are durable, cannot be scratched with a file and will retain their brilliancy forever. The chief value of the discovery of the synthetic process is, that it makes it possible for anyone to own these beautiful gems. We quote these stones in ring mountings on this and other pages, also in scarf pins, shirt studs and ear drops; we will replace free, any synthetic ruby or sapphire which loses its color or brilliancy. The Pearls in 45B1495, 45B1498 and 45B1500 are genuine pearls raised by scientific oyster culture. They closely resemble natural Oriental Pearls in beauty and durability.

Colors of Gems

The following are the colors of the gems used in our rings: **Ruby,** bright red. **White Sapphire,** colorless. **Blue Sapphire,** dark blue. **Garnet,** dark red. **Amethyst,** purple. **Topaz,** light brown. **Emerald,** dark green. **Opal,** milky shade, with red, green and blue fire showing through. **Bloodstone,** dark green with red veins. **Sardonyx,** reddish brown. **Moonstone,** colorless opaque. **Agate,** white semi-transparent, dark mottled figures inside. **Turquoise,** light blue.

All rings in the two upper rows are 14-k, solid gold, the same quality as diamond mounting. All other rings on this page are solid 10-K gold, which is the standard quality.

How to Get The Correct Finger Size

To Get Correct Size From An Old Ring

If you have an old ring that fits, place it over these circles till you find the one that is the exact size of **inside of ring.** The number under the circle denotes your finger size. If your ring is smaller than one circle and larger than the next, order half size between. For a wedding ring or band ring, order size ¼ larger than measure indicates.

To Measure Finger For A Thimble

Follow same instructions, but order 3 sizes larger. For example, if old thimble fits circle 7, you should order a 10-size thimble, etc.

How To Measure Size Of Finger

Wrap a narrow strip of paper around large joint of finger. Cut the paper off so the ends just meet. Enclose this paper with your order or lay it on scale above, so that one end of slip just covers black line at left end of scale; the figure at the other end of slip is the ring size you need. If end of slip falls between two numbers, order a half-size larger than the smaller of the two numbers. For plain wedding ring or engraved band ring, order size one-quarter larger than measure indicates.

SOLID GOLD SEAMLESS WEDDING RINGS

FINE QUALITY - LOWEST PRICES

One-Piece Seamless Wedding Rings at Postpaid Prices

Our immense sales of wedding rings have enabled us to bring the price down to the lowest possible notch—much lower than the prices of jewelers. Made from one piece, without any solder. The quality of every ring is stamped inside, and in accordance with the gold stamping laws, the quality must be what it is stamped. Nearly all the value of these rings is in the gold, the charge for workmanship being very little. When you buy a ring of this kind you get an article that will last until it is worn down to a thin wire. Will always retain its original color and solid gold appearance. We furnish these rings in all sizes. **Do not fail to give size when ordering—for instructions for measuring finger, see bottom of preceding page. All illustrations on this page are actual size. We engrave wedding rings free and ship postpaid. Each packed in a neatly lined box.**

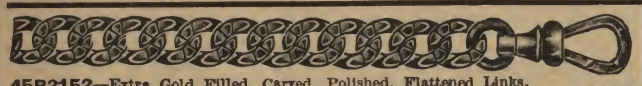
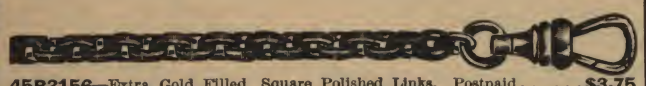
Men's Gold Filled Vest Watch Chains. Prices Include Postage



45B2150—Postpaid, $3.85
Curb Chain with Fancy Twist Bar. Extra quality. Gold filled. Polished. Flattened top, bottom and sides. This is a very high quality chain. Beautifully made. Finished with gold soldered links. At retail this chain would cost at least $5.00 and probably $6.00.

When length is not stated, chain is regular length, about 11 inches. Illustrations show exact width. All, except 45B2208, 45B2194 and 45B2178, have drop piece for charm, with spring ring, bar and swivel, like 45B2181. Our extra gold filled chains are priced no higher than ordinary gold filled chains; all links are gold soldered except Nos. 45B2154, 45B2186, 45B2190 and 45B2198. The outer shell of gold is nearly twice as thick, as in most gold-filled chains. This gives wearing quality almost equal to solid gold. We will replace any of these chains if the gold wears through in any place.



45B2181—Postpaid $4.95
Curb Chain. Extra quality. Gold Filled. Extra heavy. Polished. This is one of the best gold filled chains that can be made. Every link is soldered with gold. The extra, heavy outer shell of gold, makes it, in wearing quality, and appearance, almost equal to the best solid gold chain.

Men find this catalogue a mighty convenient place to buy from. It appeals to them because men are not by nature the "shoppers" that women are. To simply turn over a page at a time, making selections as you please, is many a man's idea of the right way to buy. That's why our men's lines have so much support — we make it so easy and so saving to buy anything — whether it's a piece of jewelry, a hat, necktie, pair of gloves, or a complete suit. A whole outfit is just as easy to buy from this catalogue as is a single item. Try it.

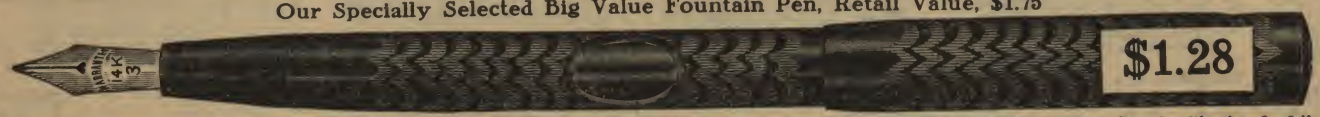
Reliable Fountain Pens—Low, Postpaid Prices

Free

We give one of these patent safety clips to hold fountain pen securely in pocket, free with every fountain pen on this page excepting 45B4232 to 45B4236 and 45B4252 to 45B4256.

The Fountain Pen is the writing instrument of today. If you have never tried one you will be agreeably surprised to find how much faster and easier it is to write with a good fountain pen than with a common dip pen. The convenience of always having pen and ink in your pocket is the biggest advantage in a fountain pen.

We do not sell cheap, flimsy pens. All the pens on this page will give good service. You can find fountain pens at as low a price as ours, but none that are better value for the money. We show on this page everything from the finest pens made down to the cheapest reliable pen for the money (45B4270). The points are 14k solid gold, hard iridium pointed. Holders are fine, hard rubber. Illustrations show actual size.



This shows the handy manner of filling Lakeside Pens 45B4200 to 45B4230 inclusive. Just dip the point in an inkwell — a pressure of the finger and pen is filled.

Lakeside Patent Self-Feeding Pens. Our Best Value

Nos. 45B4200 to 45B4230 are the most desirable pens of this kind in the market and have the simplest method of filling. By turning the nozzle which holds the gold pen half way around, the nickel bar which covers ink sack is exposed. By a single pressure of the thumb on this bar the ink sack is compressed, expelling the air; then dip the gold pen below the surface of the ink, release the spring and the pen is filled. After pen is filled, section which holds pen is turned half way around and covers up the spring. Pens can be cleaned instantly by the same method used in filling, simply using water instead of ink, compressing the sack two or three times, thus drawing the water in and squirting it out through the nozzle without the necessity of taking the pen apart at all. These pens cannot sweat or leak, as there is no screw joint, and the ink does not come in contact with the outer barrel at all.

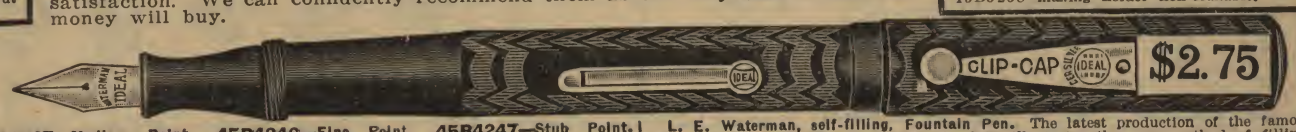
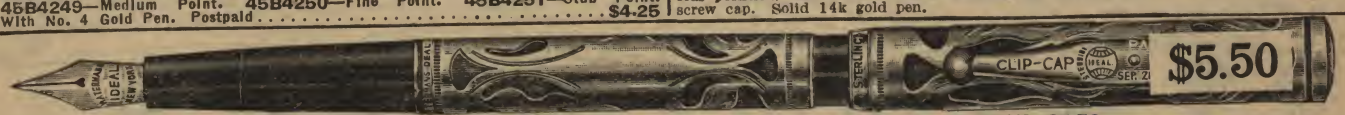
Genuine L. E. Waterman Ideal Fountain Pens

Waterman Pens occupy a high position in the fountain pen market. They are among the leaders. Nothing is stinted in the making of a Waterman Pen. Only the very finest material is used and only the most skillful and careful workmen employed in their manufacture.



The factory inspection of Waterman pens is very rigid, consequently it is a rare thing for us to receive a complaint that one of these pens does not give satisfaction. We can confidently recommend them as the very best article that money will buy.

The New L. E. Waterman Self Filling Fountain Pen



METHOD OF FILLING 45B4245 to 45B4251

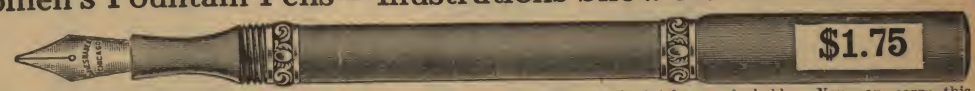
The Packard Safety, Non-Leakable Fountain Pen, Splendid Value



$1.25

The Packard Non-Leakable pen. Length, closed, 4⅝ in. This is the best value in a non-leakable Fountain Pen that we know of. Illustration shows exact size. The Packard Pen is a perfectly air tight bottle when the cap is screwed down. It can be carried upside down without leaking a particle. By turning end of barrel around to the right, the pen is brought out in position for use. When end of barrel is turned back to the left, the pen disappears inside case. When not in use, the cap screws over the pen section, making a perfectly non-leakable holder. The material is the best to be had. Fine hard rubber holder, beautifully finished. 14K solid gold pens, pointed with hard iridium. We recommend the Packard as an article that will give good service for many years. Pens of this quality sell for $2.50 or $3.00 at retail. We have never seen one sold at anywhere near this record-breaking price. Complete with safety clip, illustrated at top of the preceding page.

45B4309—Medium Point. **Postpaid** **$1.25**
45B4310—The Packard Non-Leakable Pen. Fine Point **1.25**
45B4311—The Packard Non-Leakable Pen. Stub Point **1.25**

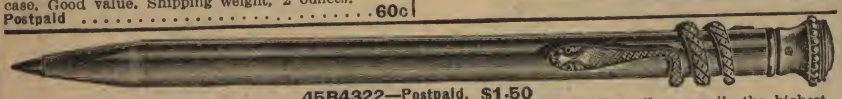
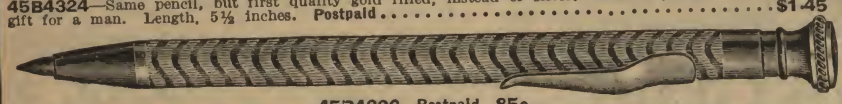
Low Priced Ink Pencils For Ruling, Manifolding and General Writing



$1.25

45B4318—Red and Black Riverside. Considered the Finest ruling, manifolding and general writing ink pencil. Constructed of most expensive materials. It writes beautifully, having a delicately adjusted spring needle, which is ready for use the moment it touches the paper. The holder is fine Red Para rubber, feed section and tip of black rubber. The black rubber feed section, being harder than the red rubber, makes a perfect joint, which will not leak when screwed up tight, and it is unusually strong. Is sold at $1.75 to $2.00 in retail stores. Complete with safety clip, illustrated at top of preceding page. Our price, **Postpaid** **$1.25**

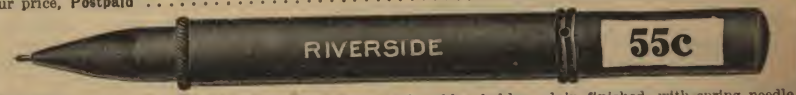
75c



45B4320—The Taper Point Riverside. Made of finest black Para rubber with spring needle point. A good sized holder that carries a good deal of ink. Furnished with safety clip described at top of preceding page. The large quantities of this pen which we contract for enable us to put its selling price down to a remarkably low figure, considering its high quality. We do not know of a good stylographic pen in the market of this size that is being retailed for so low a figure. Our price, **Postpaid** **75c**

45B4322—Postpaid, $1.50

Illustration is reduced in size. Length, 5½ inches. Full size solid sterling silver pencil, the highest grade. Burnished finish. Heavy and well made. The snake head forms a safety clip holding pencil securely in pocket when through using. Lead is released by giving the end a half turn to the left.



45B4324—Same pencil, but first quality gold filled, instead of silver. Beautifully finished. An ideal gift for a man. Length, 5½ inches. **Postpaid** **$1.45**

45B4326—Postpaid, 85c

Illustration is reduced size. Length, 5 inches. Solid sterling silver clutch lead pencil. An excellent article, will make a useful and welcome gift to a man. Fancy chased holder. Has solid silver safety clip, which holds pencil securely in pocket, so that it is not easily lost. When not in use, the lead is released by giving head a half turn to the left; lead drops back out of sight. This pencil retails at $1.25 to $1.50.

45B4328—Extra Leads for pencils 45B4322, 45B4324 and 45B4326. **Per dozen, postpaid** **22c**

55c

45B4330—Small Vest Pocket Ink Pencil. Hard black rubber holder, plain finished, with spring needle points. This little pen is made up in the best manner, and is a thoroughly practical and reliable writing instrument. It will start to write as soon as the point touches the paper, and makes an even mark like a pencil. Usual retail price of the Riverside, 75c to $1.00. Our price, **Postpaid** **55c**

You will doubtless notice that our prices on Fountain Pens are much lower than the customary retail figures. This does not mean cheaper quality of merchandise. We do not believe that our Fountain Pens can be excelled in smooth writing and long service.

45B4344 — Men's silk ribbon Fob. Polished, roll gold plate trimmings. Illustration is reduced. Fob is full regular size.

Honesty That You Can Bank On

There are two kinds of honesty just as there are two kinds of almost anything else.

First—There is commercial honesty, in which the crime lies in getting caught. Sleeves a little short, workmanship a little skimped, a few less stitches than there should be, one coat of varnish left off, just a little taken off the value that you, the buyer will never miss, that's commercial honesty.

Second—Real old fashioned 24-karat honesty, the kind that won't rub off, the kind that's all wool and 36 inches wide, the kind that very often gives more, never gives less than it promises—that is old fashioned honesty—that is the honest foundation stone on which this business has been built from the very first day of its existence, 43 years ago.

That's the kind of honesty that holds trade through one generation to the next. That's the kind of honesty that turns a trial order into a permanent customer, and finally, that's the kind of honesty that you can bank on.

ZERO VACUUM BOTTLES and LUNCH KITS

Comparative tests with other makes have proven that Zero bottles are the strongest and most satisfactory vacuum bottles made. The makers of these bottles are the only manufacturers we know of who use no glass bottles, except those that have been tested and found perfect. In efficiency, construction, and finish, they are unexcelled. Two strong glass bottles, one within the other, sealed at the neck, leave a vacuum space between the two bottles, and form an absolute nonconductor of heat and cold. The outer bottle is covered by a metal protecting shell. You can fill the Zero bottle with boiling hot coffee, or an ice cold beverage, and it will keep nearly the same temperature for two days. A Zero bottle, in any weather, will keep liquid contents ice cold for two days, or hot for twenty-four hours. Will keep milk perfectly fresh in any weather, without ice or preservatives of any kind. Our immense sales enable us to offer these standard articles at prices which make them no longer a luxury. Height, of pint bottles, 10⅝ inches. Height of quart bottles, 14⅛ inches.

Best Quality Bottle Nickel Plated

$1.80 and $2.70

Our Special Model, one-pint Zero Bottle. Equal to any of the highest priced nickel plated bottles. Extra strong metal case, heavily nickel plated. Can be taken apart and cleaned or a new inner bottle inserted in less than a minute. Neck protrudes above metal casing, preventing contents from coming in contact with metal case when pouring. Screw top, serves as drinking cup.

Individual communion ware has come rapidly into such general use that the old style communion service is seldom used. Two very good reasons for this are that it is perfectly sanitary and is much more conveniently handled than the old style sets. The set consists of a tray, fitted with a removable rack, which holds the glasses. The customary prices quoted by retailers on communion ware are distinctly higher than our modest prices. We take special satisfaction in supplying these goods at fair prices and invite your comparison of our prices on these sets with the figures ordinarily quoted at retail.

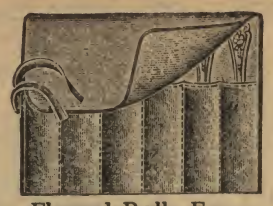
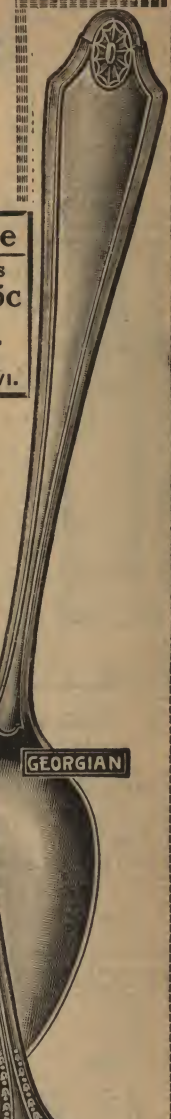
Community Silver Plate



Transportation Charges Paid



No line of silver plated ware is more widely or more favorably known than **Community Silver Plate.** Unsurpassed in quality or finish, and equalling the finest sterling silver in the artistic refinement and rich simplicity of its patterns, this splendid ware appeals to every woman's pride of ownership. The Community Quality plating of silver is thicker than triple plate, and with the heavy disc of pure silver covering the parts most exposed to wear, is made practically wearproof. Patrician is highly polished. Georgian and Louis XVI are a rich, dull finish. The Sheraton, a beautiful gray finish.

Engraving Free. All Community silverware ordered from us will be engraved without charge in the styles shown below price table.

Flannel Rolls Free. We will supply, without charge, with each set of 6 Community silver knives, forks or spoons, an excellent quality flannel roll, as illustrated here. These keep the silver from wearing and becoming scratched when not in use. **Transportation Charges Paid.** We prepay transportation charges on all Community Silverware.

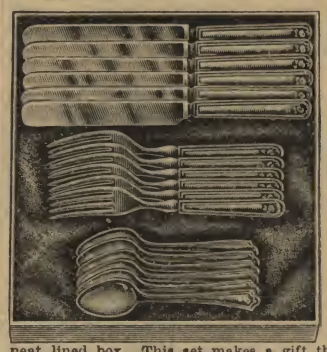
Eagle W. ROGERS ★ Brand — Silver Plated Table Ware — Eagle W. ROGERS ★ Brand



Our long experience in handling and thoroughly testing this famous old brand of tableware has caused us to consider it **the equal of any other Rogers ware made.** While our prices on this ware are considerably lower than on some other lines quoted, the **thickness of the silver plating, the finish and the designs are unexcelled.** We can heartily recommend these goods, as we have sold large quantities and they have given long and satisfactory service. The patterns shown are the finest in the entire line and represent the best and most recent art of the silversmith.

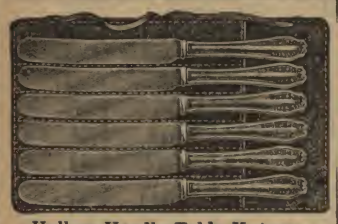
Special Savings In ★ ROGERS & BRO. Silver Plated Ware

Notice the Extra Silver Plate Protecting the Parts Receiving the Most Wear

For more than sixty years this famous table silver has held its high reputation for durability, finish and beauty of design. No other Rogers goods are better made or more durably plated. At our exceptionally low prices, this is one of the most desirable values in silver plated ware we know of. We have selected three especially tasteful patterns. The Garland and Florette are the popular soft French gray finish; the Grecian, bright polished. Sterling silver could hardly be more attractive. We recommend these goods, because we know they will give lasting satisfaction.

The illustration shows the practical way in which the silver plating is applied. A heavy plate of silver is first deposited on the parts that receive the hardest wear—the backs and points of the bowls or tines, and backs of the handles. Another equally heavy plate is then deposited over the entire surface of the article, making them fully as serviceable as triple plated ware and at a much lower cost.



The spoons and forks are the only pieces treated in this way. The fancy pieces, such as Berry Spoons, Cream Ladles, Meat Forks, etc., are not subjected to constant wear. These are plated just as heavily, but do not have the sectional plate.

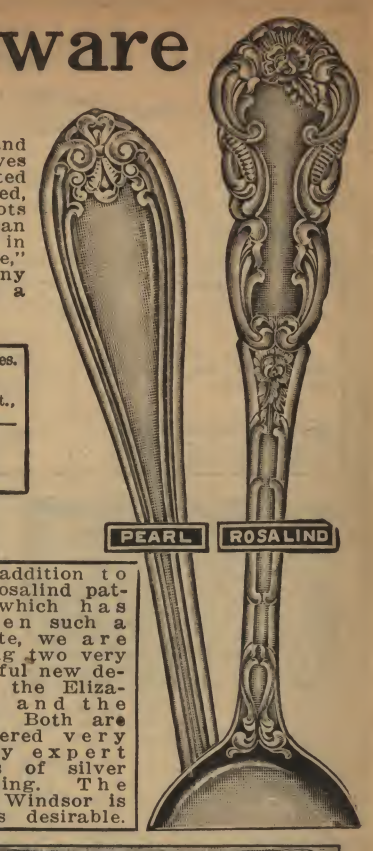
The Celebrated Panama Tableware



Looks Like Real Silver; Wears Better

Panama Tableware will outlast solid sterling silver—in fact, it will wear an **ordinary life-time. Beware of cheaper ware claiming to be just as good.** Tableware purporting to be of equal quality is offered at slightly lower prices, but twenty years of service in the homes of thousands of satisfied users is sufficient proof of the superiority of Panama ware. Panama Tableware is not silver, and contains no silver, but is a solid metal throughout, highly polished. In appearance it resembles solid silver, but is tougher and harder, therefore wears better. The knives hold as good an edge as steel silver-plated knives. As there is no plating to be damaged, you can scour these goods to remove spots or stains, and any silver polish or powder can be used to clean them. They are put up in neat packages and stamped "Panama Ware," which is a guarantee of quality. We sell any quantity of knives, forks or spoons, from a single piece up, at dozen rates.

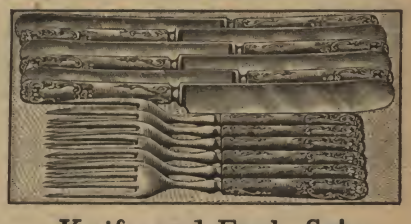
Panama ware costs very little, and there is no table ware any better for every-day use. On account of the extreme hardness of Panama ware, we cannot engrave with name or initials. Made in no other pieces than these quoted here.

In addition to the Rosalind pattern which has proven such a favorite, we are offering two very beautiful new designs, the Elizabeth, and the Pearl. Both are considered very fine by expert judges of silver designing. The Plain Windsor is always desirable.



Knife and Fork Set

46B7512—Set of Plain Handle Knives and Forks. Six of each in a neat lined box. Match the Windsor pattern. Price **$2.40**

46B7514—Set of Pearl pattern Knives and Forks. Six of each in a neat lined box. Price **$2.50**
Length of knives, 9¼ in. Shipping weight, per set, 40 ounces.

The increasing popularity of Panama ware and the many calls for a larger selection of patterns, have led us to add two new designs—the Elizabeth and the Pearl.

46B7510—**Twenty-six pieces.** All practical for daily use: Six Embossed Elizabeth pattern table knives, six forks, six tea spoons, six table spoons, one sugar shell, and one butter knife, in a nicely lined leatherette case. This is a new and elegant pattern. In finish and appearance looks like genuine silver. Will last a lifetime. This set makes a beautiful wedding present, that will be appreciated. The greatest value ever offered in Panama Ware. Shipping weight, 6 pounds.

at Extremely Economical Prices

These Goods are all Genuine Rogers Make. While the prices are very low, this ware is plated as heavily as most triple plated goods of higher priced Rogers' lines. Each piece will wear satisfactorily, and bears the maker's name, which means that the maker's reputation also stands back of the quality. Our prices are distinctively lower than the customary retail prices.

This is a special chest of Tableware for wedding, holiday, or birthday gifts. In making it up we have borne in mind the fact that a gift of this kind should be first-class in quality, so we have put in nothing but triple plated goods which will last for many years. All genuine Rogers' triple plate, each piece stamped with the manufacturer's name. Pattern is the Floral design, one of the most popular in our stock. The case is well finished, high polished hardwood, metal trimmings, nicely lined. Serves to display the goods and will always be useful as a receptacle to keep them clean.

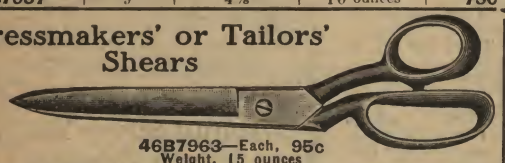
Put up in a fancy lined leatherette roll with loops to hold each piece separately.

Shears, Scissors and Scissor Sets



Lakeside Bent Pattern Shears

The bent handle is well adapted for all work, for which the straight trimmer is used, but in addition is the ideal shear for cutting cloth on a table. The bent handle gives a full cut of the blade and enables the user to follow a line accurately without lifting the material. Our bent shears are made in two styles; full nickel finish or nickeled blades, with Japanned handles. Both, however, are the same cutting quality, the only difference being in the handles.

Dressmakers' or Tailors' Shears

46B7963—Each, 95c
Weight, 15 ounces

Finest quality, heavy steel laid, Dressmaker's shears. Made from selected steel. Keen edged. The right pattern to properly fit the hand. Perfectly adjusted. The blades run smoother and cut cleaner than shears costing much more than the price we ask. Nickel-plated blades. Japanned handle. Length, 12 inches. This is the best shear of its kind, and a special value at the price we ask.

No Matter What the Price, there are No Better Shears than Lakeside

Lakeside shears are made from finely tempered steel blanks, with special laid steel cutting edges. They are perfectly fitted, finished and sharpened. A finely tempered piece of steel is laid on the face of each blade; this forms the cutting surface. In this way the best possible cutting quality is obtained. A solid steel shear cannot be evenly tempered, and is liable to break if it falls on the floor or other hard place. We sell only laid steel shears.

Premier Shears

Our Lakeside Premier shears are exactly what the name implies—the acme of perfection in shear making. Superior in **quality, temper, fitting and finish, to any shear we have ever seen.** Oval pattern just the right weight for ladies' use; keen edged, perfectly uniform in temper. Full nickel plated and splendidly finished in every respect.

In cutting qualities, durability and beauty of finish, we believe that our Premier Shears are the finest on the market—certainly they cannot be equaled at anywhere near our price.

Extra Quality—Six Knives and Six Forks, $1.24

46B8143—Price, per set, 6 knives and 6 forks **$1.24**
Shipping weight, 2 pounds.
Fine Cocobola Handle Knives and Forks with double bolsters. One of the latest designs. The steel used in their manufacture is of the very highest grade. The knives which come in full swaged and curved pattern blades, seldom need to be put on a steel as they hold their edge remarkably well. The forks have four well made spring steel prongs, and a wide shank which will not give. These are the better grade goods, of high workmanship, well finished, and durably constructed. This is an exceptional value which, we believe, cannot be excelled.

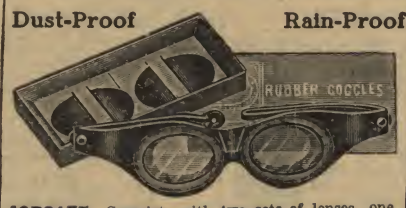
Latest Styles in Goggles for Every Purpose—Low Prices

Zylonite—Tortoise Frame Amber Spectacles

46B8170—Per Pair. **75c**
Shipping Weight, 6 ounces

These are the latest in Automobile Spectacles. They afford great protection to the eyes. The lenses are large and correctly curved, to give a large field of vision without the possibility of obstruction. The Zylonite Tortoise frame makes them very light—in fact, so light you will hardly notice the weight of them. They are comfortable, stylish and becoming. A very fine grade of optical amber glass is used. This gives more uniform illumination and surer definition. We know that if you are in the market for a pair of automobile spectacles and you were to see these you would be highly pleased with them. We would like to have your order for a pair. They will be exactly as represented, and we feel sure they will please you perfectly. A carrying case is included.

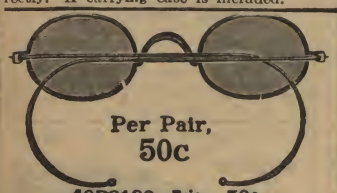


Imitation Tortoise Shell

46B8173—Complete in Case **$1.13**
Shipping weight, 6 ounces.
Up-to-date Imitation Tortoise Shell Goggles. Frames are light mottled color, a perfect reproduction of real tortoise shell. Hooks going over the ears are round and smoothly polished. No danger of chafing or cutting. Frames are slightly curved in shape so that lenses do not stand out too far from the eyes. They thus afford better protection than straight front goggles. Shape of lenses permits full vision, both at sides and below. Amber lenses, width, 2¼ inches; depth, 2⅛ inches. First class in every respect, and previously sold at double our price. Complete, in black leatherette covered case.

Ventilated Rubber Goggles

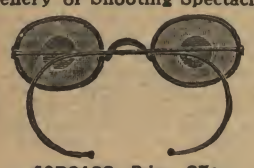
Dust-Proof Rain-Proof



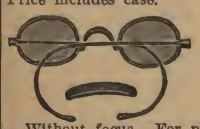
46B8175—Complete with two sets of lenses, one amber and one clear white **45c**
Shipping weight, 6 ounces.
Sanitary, comfortable. A double set of lenses furnished with each pair. One set amber color and one set plain white. Lenses are instantly removable or interchangeable. Held tightly in grooved rubber eye cups. Adjustable elastic head band. The 2-lens combination saves carrying two pairs of goggles. On a bright day, use amber lenses to protect the eyes from the sun and dust. When darkness comes on slip out the amber lenses and insert the plain white lenses, which will protect your eyes from the wind and dust and give you a much clearer sight in a dim light.
46B8176—Same goggles, with 1 pair of white lenses only **39c**

De Luxe Amber Spectacles for Autoists

46B8179—
Price Per Pair in Case
$1.25



Shipping weight, 6 ounces.
These popular spectacles are especially made with extra fine amber glass, and are taking the place of regular types of auto goggles. They are very comfortable and stylish. The fine grade optical amber glass affords perfect protection and rest. The lenses are made quite large and carefully curved, to give a large field of vision. Frames are 10-karat gold filled. Hoop bridge, strengthening brace on top of frame. Cable temples are used. These do not hurt the ear as do the solid wire temples, which are used on some spectacles of this type. These are the highest grade goggles of this type that we know of, and should not be confused with the cheap, metal-finished goggles that are now on the market. Each set put up in a strong cloth-covered metal case, with spring snap cover. We recommend these goggles to you.



Per Pair, **50c**

46B8182—Price, 50c
Shipping weight, 3 ounces.
Amber color lenses are rapidly taking the place of all other colored glasses worn for protection purposes in outdoor pursuits. Amber gives a clear definition and shades the eyes from all strong lights. Fine quality, polished, nickel plated riding bow frames. Price, per pair . . . **50c**
46B8185—Same lenses in Rimless Spectacles **75c**
Shipping weight, 3 ounces.

Scenery or Shooting Spectacles

46B8188—Price, 35c
Shipping weight, 3 ounces.
These improve the vision wonderfully when viewing a field or landscape, and prevent the eyes from being affected by strong light. The lenses are amber colored, with plain centers and ground field and are without focus. The frames are full polished, with riding bow temples. Price includes case.

Colored Lens Spectacles

Without focus. For protection to weak eyes. Prices include case. Shipping weight, 3 ounces.

Combination Day and Night Goggle

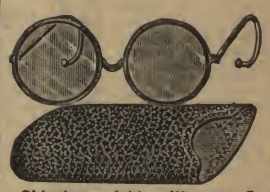
46B8200—Price **58c**
Shipping weight, 4 ounces.
Combination plain and amber lens goggles. They are especially desirable because they are good for either day or night driving. Have two pairs of celluloid interchangeable lenses; one pair of amber color, for sun protection; one pair of clear lenses for night driving or dark days. Can be interchanged instantly. Polished nickel, ventilated frames. Adjustable elastic head band. The wide lenses, separated only by a narrow border, give clear vision. These are very neat appearing goggles which ordinarily retail for 75c to $1.00. They take the place of two separate pairs of goggles, furnishing ample protection and clear sight for the eyes in any light.

The New Dimmer Goggle

46B8205—Price **48c**
Shipping weight, 3 ounces.
Most practical goggles in the market. Made of transparent composition, flexible and unbreakable. Soft rubber border. Upper half is dark green, giving protection from sun; lower half, amber. The natural line of vision is through the lower amber lens. When wearer meets a blinding light by slightly bowing his head, he looks through the dark green lens, and has perfect protection from dazzling rays. No obstruction to vision in center. Elastic head band. Ventilating holes in upper edge.
46B8206—Same goggles as 46B8205 with brown felt border **30c**

Aluminum Frames

46B8210—Per pair, 35c
Shipping weight, 4 ounces.
These goggles are light in weight, frame being made of aluminum, hinged in center to fold. Funnel-shaped eye pieces, large enough to wear over ordinary spectacles. Large, heavy glass lenses. Non-collapsible eye cups, set in soft leather; mask bound with chenille. Adjustable elastic head band, with sliding buckle.



46B8213—Price, 15c
Shipping weight, 4 ounces.
Bound goat skin mask, edged in velvet, fitted with ventilated aluminum cups, and 1⅞-inch good, clear lenses.
46B8215—Same style as 46B8213, but unbound. Per pair **10c**

Spectacle Goggles

46B8218—Amber color **50c**
46B8220—Smoked **50c**
46B8222—Clear glass **50c**
Shipping weight, 4 ounces.
This is a novelty in spectacle form, with riding temples and hinged wire gauze, protecting shields. The wire gauze shields on the sides prevent dust or other flying matter from entering the eyes. Fit closely to the head and are large enough to be worn over any ordinary size eye glasses or spectacles. Especially useful for a motorist, railroad man or machinist. The lenses are flat without focal power.

Per Pair, **23c**
46B8225
Shipping weight, with case, 5 ounces.
Spectacle goggles. Neat looking. Nicely finished. Nickeled frame. Very light, but strong and well made. Amber lenses, diameter, 2 inches. Twist cable hooks, very soft and flexible. Do not chafe or cut behind the ears.

Send for Our Eyeglass and Spectacle Circular

We can save you money on spectacles and eye glasses, for we maintain a department supervised by Dr. Carl Christoff, who has had 16 years of experience in the fitting of spectacles and eye glasses by mail. The many thousands of our customers whom Dr. Christoff has successfully fitted will testify to his skill in this respect. We make no charge for fitting, either by mail or if you call at our store. Our only charge is for the spectacles or eye glasses, if you buy, and this is much lower than the prices for which similar goods are sold by opticians or in jewelry stores. Circular, containing prices and descriptions of all of our spectacles and eye glasses, together with test type and full instructions for measuring the eyes, will be sent postpaid on request.

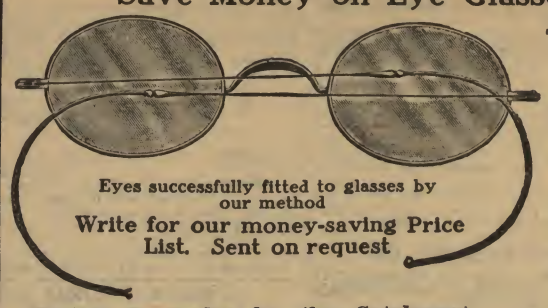
45B5751 — Price, Snellen Reform double-backed eyes, each **$5.00**

Aluminum Spectacle Case



This makes a very handsome article, well suited for gift purposes, and at the same time affords better protection than the ordinary leather finished cases. Is also more durable and considerably lighter. The raised parts of design are bright and the background French gray, making a very pleasing contrast. Each case is velvet lined and has an embossed design on the back. Just as durable as a sterling silver case and at the same time much lighter and sold at a small fraction of the usual price for such cases.

45B5750 — Standard quality, shell eyes, each **$3.75**

45B5751 — Snellen Reform double-backed eyes, each **$5.00**

Save Money on Eye Glasses and Spectacles

Eyes successfully fitted to glasses by our method

Write for our money-saving Price List. Sent on request

Send for Our Illustrated Price List of Spectacles and Eye Glasses

With Eye Test Types and simple, complete directions for properly testing the eyes and for ordering.

It quotes money-saving prices on spectacles, eye glasses and optical specialties. This department is in charge of Carl Christoff, O. D., a graduate Doctor of Optics. Dr. Christoff has been successfully fitting our customers with spectacles and eye glasses for 16 years.

Fitting Spectacles by the Catalogue Method is entirely practical. A personal visit to an oculist is unnecessary. The large numbers of prescriptions that we fill every day, and the thousands of satisfied patrons we have served in the past, are conclusive proof of Dr. Christoff's ability to fit your eyes correctly by mail.

If your eyes tire in reading or sewing—if objects "swim" or blur under a steady gaze—if the eye ball aches or the eyelids are often inflamed—the chances are that you need glasses.

Dr. Christoff can fit you correctly. The great relief afforded by well-fitting glasses and the future discomfort avoided will be well worth the very small prices we ask. No charge for fitting the glasses — our prices are for the spectacles only.

When visiting our store, do not fail to visit our doctor. He will serve you thoroughly and courteously. No charge for examination. Charges are only for the glasses themselves, if purchased.

Shipping weight, 13 ounces.
Length, 10 inches.

Same as 45B8285, but with spirit filled tubes for cold climates. Registers 60 degrees below. High grade, and an excellent value. Very accurate and reliable.

The Tycos Hygrometer

46B8287—
Price, $2.00
Shipping weight, 20 ounces.
Length, 8¾ inches.
Width, 4½ inches.

A useful instrument to record the degree of humidity or moisture in the air. Particularly valuable for use in granaries, incubators, hot houses, etc. Consists of two thermometers, one having a dry bulb, the other with the bulb moistened from wick, which rests in lower part of glass syphon tube. By comparing the standing of the two thermometers and referring to the ready reference humidity table, which accompanies the instrument, you can at once tell the degree of humidity in the atmosphere, and whether or not frost may be expected. Instrument is well made. Mounted on an oak frame.

In the selection of our various thermometers, we have constantly kept in view the matter of satisfactory service. Our analytical department makes frequent tests of our thermometers, and patrons can be assured that every instrument purchased from us will give satisfactory service in proportion to its cost. Of course, the cheaper instruments are not as accurate as the higher grade, but they will serve for all ordinary purposes, and every instrument on this page will be found to be exactly as we represent it, and at a price much lower than regular retail value.

Size, 3½x4½ inches.

The Incubator Hygrometer is used in connection with the incubator thermometer, to register humidity, so that proper incubating conditions can be maintained at all times. Hygrometers are almost a necessity to insure large hatches, as the amount of moisture required during incubation varies. By the use of the Incubator Hygrometer the moisture can be noted and regulated, and the hatching simplified. Millions of chicks perish in the shell every year because of improper moisture conditions. Made by the Taylor Bros. and is part of the standard equipment of many of the leading incubator manufacturers.

46B8400—Price, $3.25
Shipping weight, 14 ounces.

Powerful Pocket Spy Glasses. Fitted with extra high quality achromatic lenses of finest definition. Rounded nickel-plated caps fitted to each end. These caps make them dust-proof and protect the lenses. The draw tubes are of burnished brass, body covered with morocco leather. Thorough workmanship and finish throughout. Very convenient to carry, and useful for general purposes. Length, closed, 6¼ inches; extended, 16 inches. Magnifying power, 13 times.

Clear Vision 35-Power Telescope $15.75

46B8403—Price, $15.75.
Shipping weight, 4 pounds.

This is an exceptionally fine grade, high power telescope. It has an extension sun shade, and sliding sleeve, fitting front end of glass, which can be extended to shade objective lenses from rays of the sun. Five section polished brass tubes, measuring 41½ inches when extended and 12¼ inches when closed. Covering is heavy black morocco leather, pebbled finished. Very durable and of attractive appearance. Lenses are high grade achromatic, magnifying 35 times, with fine definition. An excellent glass for viewing the moon and satellite, as well as for ordinary use. Has slide for eye pieces and cap for objective lenses. Is 25 lignes in diameter.

Low Priced, Achromatic Telescopes

These telescopes represent the best value, and will give the most service for the price of any we know of. The tubes are highly polished, lacquered brass. Bodies are covered with black pebbled leather. Fine achromatic French lenses of clear definition and strong magnifying power. Lacquered brass cap to protect objective lens. Sliding cover to protect eye piece from dust.

Great Shortage of Field Glasses and Telescopes

Nearly all of the high grade field glasses, telescopes and other optical instruments are manufactured in Europe. The countries where these articles are made are, at the time this is being printed, engaged in war. For that reason it is impossible for us to procure regular quantities, and our line of these goods is much smaller than usual. It is contrary to our policy to illustrate goods, unless we have them in stock or have a reasonable certainty of being able to procure a supply, before we commence to receive orders. If you are interested in any high grade telescope, field glass, or other optical instrument not quoted in this catalogue, write us, and if possible we will furnish the article you desire. We use the word "ligne," a technical term, in giving diameters. About 11 lignes are equal to one inch.

Genuine Bardou Rifle Range Telescope

46B8413—Price, complete with shoulder strap, $22.75
Shipping weight, 3½ pounds.

In this telescope are combined the good qualities of the highest grade terrestrial and celestial instruments, Bardou being recognized as the king of all telescope makers. The Rifle Range is attractively oxidized in black and has extension sun-shade. The body is covered with fine, black stitched morocco. Strong leather caps fit over the objective lens and eye-piece, protecting them from injury. The lenses yield most perfect definition. So perfect is this quality that with this glass, when used in a clear atmosphere, a bullet mark can easily be distinguished at 1,000 yards. Size of the objective lens is 22 lignes. Length of glass extended, 35½ inches. When closed, 11 inches. Magnifying power, 33 times. Weight, 3 pounds. Illustration shows the sun-shade extended. This neutralizes the glare from sunlight, making observation easy on the eye. Note that our glass is the genuine Bardou instrument. Beware of imitations.

For higher power astronomical observations a solar eye-piece of 56 times magnifying power, with detachable sun-glass, can be furnished to fit the Rifle Range telescope.

46B8414—Extra solar eye-piece for 46B8413, with directions for inserting same. Shipping weight, 12 oz. Each **$4.85**

Bausch and Lomb Zeiss Stereo Binoculars

The original stereoprism binocular glasses. The feature of these splendid glasses is their powerful magnification, and compact size. They are the cheapest strictly high class glases in the market at the present time, and we recommend them fully. One of the chief considerations in selecting a field glass is the power. By the power is meant the number of times which the glass will magnify a distant object. For example, an object that is visible to the naked eye at one mile can be seen at a distance of six miles with a six power glass. A high power glass is not always preferable. The low power glass gives a larger field of vision, and greater illumination. The 6 and 8 power glasses are the most satisfactory for all around use. The mountings are of aluminum, very light and compact. Barrels are ribbed for strength, and will exclude dust and dampness. Covered with best, black, vulcanized rubber, finished to resemble exactly Morocco leather, but more durable and moisture proof. All exposed metal parts are neatly lacquered in black. Each glass marked with its power.

Three adjustments render them adaptable to any eyes. The barrels turn on a center hinge, to obtain correct distance between the eyes. By a convenient knurled thumb screw the eye pieces are adjusted simultaneously and evenly. For persons whose eyes are not alike, separate adjustment of objective lenses is possible.

46B8417—6 power Stereo Binocular. Diameter of objective lenses 24 millimeters. Linear field of vision, 120 yards wide at a distance of 1,000 yards. A particularly satisfactory glass for the study of birds and animals. Its great illumination makes it superior to higher power glasses for use in woods or where light is limited. Also desirable for use at races, and games, or to observe any object in motion. Small, compact, and convenient to carry. Length, closed, 3½ inches. Width, 5½ inches. Weight of glass, 21 ounces. **Shipping weight, 3 pounds. Price** **$43.50**

46B8418—An 8 power Stereo Binocular. Diameter of objective lenses 21 millimeters. It differs from 46B8417 in having higher power and being more desirable for examining objects at a great distance. The linear field of vision is 90 yards wide at a distance of 1,000 yards. Length, closed, 4½ inches. Width, 5 inches. Weight of glass, 15½ ounces. **Shipping weight, 3 pounds.**
Price **$43.00**

Reading Glasses

High Grade American Made Reading Glasses

A Reading Glass is a wonderful help to old people, or those who do not possess good eyesight. It does not interfere with the wearing of eyeglasses or spectacles, but adds to their usefulness, making it easy to read the finest type. Is a great help in examining pictures, photographs or fabrics.

The larger sizes are also very powerful sun glasses, and in the bright rays of the sun will quickly ignite any inflammable material, such as paper, shavings or dry leaves. We handle two grades: best quality American made glasses, and second quality imported. The first grade is far superior. The first quality has the best lens in the market, **extra highly polished nickel plated frames,** and Ebony handles. **Best Quality American Made Reading Glasses.**

Microscopes

Students' Portable Microscope

46B8472—Price, $9.00
Shipping weight, 4 pounds.

$9.00

In our portable, compound microscope, the case, covered with a durable imitation leather, velvet lined, forms a base for the Microscope when in use, and a receptacle for its protection or carriage. All parts pertaining to the outfit are made to standard size, the objective fitting having a society thread; therefore extra accessories of any maker may be used. Coarse adjustment is secured with the sliding draw tube and a device attached to the stage gives a micrometer adjustment of delicate precision. The optical equipment consists of a one-inch eye piece and a two-thirds and one-inch divisible objective, yielding a magnifying power of 100 and 64 diameters, respectively. This microscope is not limited to elementary work but is well qualified to cover a wide field of microscopical research.

School Microscope

46B8474
Price, $6.85
Shipping weight, 2 pounds.

Stands 8 inches high. Has Japanned base, with hinge. Body of finely polished brass. Large and firm stage, with brass springs for holding object. Beneath stage is a mirror for illumination of transparent objects. Has large, knurled adjusting screw, making it easy to focus. The objective lens is separable into three objectives, giving powers of 20, 50 and 70 diameters. Comes in polished wood box.

A good, little, compound microscope, especially suited for school use.

Home Microscope

$2.10

46B8476
Shipping weight, 16 oz.

Baby Carts AND Carriages

In selecting this line of baby carts and carriages, we have kept in mind, above everything else, the comfort of the little occupants. Every carriage is made with improved spring construction, which absorbs the slightest shocks and protects baby from jolts and jars.

Our carriages have the best of material and workmanship, are strongly constructed in every way and will stand the wear and tear of every-day use as well as any made.

No less than five of the leading American Manufacturers are represented in our line and from each we have selected their best and most popular styles.

Owing to our enormous buying power, we are able to obtain very favorable terms from the manufacturer and offer our carriages at prices that mean a liberal saving to you.

The superior finish of our carts and carriages is another important feature. All our wood body carts are heavily enameled and highly polished and will long retain their attractive appearance.

Reed carriages are made in three finishes, light natural color, brown or French gray. We quote our carriages in the color that seems to us best adapted to the style and design, yet if the color given is not satisfactory, we can furnish in either of the other two shades. In this case, carriages will have to be shipped from the factory with a delay of from six to eight days.

French gray is a new shade that is becoming very popular and we furnish it regularly on many of our new models.

Our Business is to Keep Down to Reasonable Prices All Those Things which you require in Your Business.

America is a nation of business men. This does not mean that everyone is selling goods in a store or over a counter. To our way of thinking, the wide-awake farmer, dairyman or ranchman is just as much a business man as the man who deals in the world's needs for profit. Every man should conduct his affairs on a business basis. He should carefully account for every item of income and expenditure, whether he sells dry goods or potatoes. The part of every wise business man is to purchase carefully and economically. Our catalogues make profitable buying easy and sure. We meet your needs for every want with qualities and prices that insure a genuine saving.

Storm Shields for Reed Carriages. Made of good quality corduroy cloth. Attached to back of hood and end of carriage to protect child from wind and rain.

Do not waste your money by paying $35.00 for an article which you can buy for $25.00.

The true way to save money is to so spend it that every dollar will do its full duty, and that out of your earnings you will have something to lay by. The argument is evident—our prices make your savings greater than usual on each purchase. A nickel or a dime here, a dollar there, and soon you find it a snug little sum that grows with little encouragement.

Many a good-sized bank account has been started with the savings made on orders sent to us. Our catalogues have started thousands in this good habit of saving.

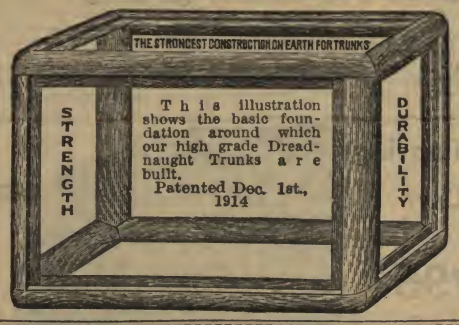
It is difficult to describe the rich style and attractive appearance of this trunk. You will consider it the best trunk ever sold at anywhere near our price.



The Strongest Inner Construction Known

The marked superiority of the Dreadnaught over other Trunks is due largely to the special reinforced frame work used by the manufacturer.

This method of construction is based on the modern steel and concrete idea of building. In other words, the reinforced wood frame of the Dreadnaught Trunk bears the same relation to its strength and durability as the steel frame does to the modern skyscraper.

Every side, bottom or top is a separate and distinct part set into a grooved reinforcing frame work to which it is fastened.

The nails in the Dreadnaught constructed corner, instead of being driven in straight as in the ordinary square corners, enter the frame work in an oblique direction. This makes it almost impossible for them to work loose, and permits of a double row of nails, constantly wedging against each other, thus giving great additional strength to each corner and edge.

Reinforced and Strengthened at Points of Greatest Wear

The frame of our Dreadnaught Trunks is made of selected three-ply basswood veneer lumber. Unlike many other trunks, all three layers or veneers are of equal quality, the middle veneer being just as thoroughly seasoned as the outer plies.

The hardware is another important feature. The use of the specially designed, combination rounded valance clamp and double dowel, together with the circle bolt and the dowels on each side of the double locks, provides sixteen interlocking dowel joints to fasten the lid to the body of the trunk. These extra fastenings were designed especially for this line of trunks. No other trunks have them.

The tray construction is in keeping with the construction of the trunk box. Around the edge is a strong reinforcing wood strip, and the corners are strengthened by metal clamps. This makes the trays very durable and capable of standing hard wear and rough usage.

WARDROBE TRUNKS

Wardrobe Trunks, though comparatively new, are fast coming into general use. They are far more convenient and roomy than the ordinary dress trunk. When properly constructed, they keep either men's or women's clothing in good condition and practically free from wrinkles. The side drawers are as handily arranged as in your dresser at home; the lower one is extra large and is fitted with a form that will hold a woman's hat of ordinary size. Three grades are listed. Price and quality considered, they are among the best values on the market to-day.

Our Lakeside Special Talking Machine

An Example of What You Can Save in This Section of Our Catalogue

$11.50 151B9110

Shipping Weight, 35 Lbs.

A Perfect Reproducing Machine Made Especially for Reproducing the Famous Pathe Records

No Changing Needles
No Scratching Records

Plays With a Smooth Round Sapphire Ball Point

Reproduces the records with a clearness and accuracy unexcelled by any machine made.
The case is made of clear grained oak in a dark golden finish. The dimensions are as follows: Width, 14⅜ inches; depth, 17⅜ inches; height, 6¾ inches. Top is made with beveled edge, heavy extension molding around bottom. The front is an open-work pattern as shown in illustration.

The Pathe Sound Box delivers the pure modulations of the human voice, the characteristic sound of any single instrument, and the full ensemble of the orchestra or band in pleasing, natural tones. It gives a rich mellow tone and with its permanent, smooth ball-shaped, genuine sapphire point, instead of the sharp pointed needle, it will appeal to all talking machine lovers.

The Turn Table is metal, diameter 10 inches, faced with green felt and bound with nickeled rim.

The Tone Arm is carefully constructed, heavily plated with nickel and fitted with thumb screw.

The Motor is well made, can be wound while machine is running, and plays one 14-inch record at one winding. Speed regulator works perfectly.

The Sound Box, in playing Pathe Records, begins in the center and moves toward the outer edge.

This machine can also be equipped to play Victor, Columbia or Lakeside records, at an additional cost of $2.50. The machine has an excellent tone and will satisfy anyone wanting a high grade machine at a moderate price. Complete instruction sheet furnished with each machine.

SOMETHING went wrong. The great pianist had skipped a note—and the critics were horrified. It was a thing that had never happened before—an accident—THE GREAT EXCEPTION. Yet—no man or system is infallible. All that human ingenuity can do WE HAVE DONE to prevent mistakes and accidents in our system. But if, perchance, you should ever be the victim of "the great exception", please don't turn critic—but GIVE US A CHANCE TO RECTIFY THE ERROR.

Fill Up With Heavy Stuff

Order that dress
—that suit of clothes
—the winter underwear
—those blankets and shoes

Now, with that as a starter, build up a freight shipment of 100 pounds. Do it for the reason that the 100-pound freight shipment is the most economical method of shipping goods. All you need to do is to get out your grocery list and add a few items that you are in daily need of—a case of corn, or some dried fruit, or some cereals. The saving on one or two of these items alone will pay the freight charges on the entire shipment.

Keep Your Money at Home, But Keep it in Your Own Pocket

This argument about keeping your money at home is all right. It's just a question of whether you are going to keep it in your own pocket or in the dealer's cash drawer.

The dealer orders the goods he sells you from Chicago, or New York, or some other large center, and he sends away to that large center all the money, except the profit he makes on the transaction.

The difference lies in the fact that in buying direct from us you save that extra profit and keep it in your own pocket.

By all means, keep your money at home.

JOHN never amounted to much — for he tried to do too many things and never finished any of them. He scattered his effort — and never "focused" anywhere. John was always poor. THE SUCCESSFUL BUYER CONCENTRATES HIS BUYING — for by so doing he conserves his effort — saves time — commands the best of service — and economizes at all points. You may now supply A FEW OF YOUR WANTS from these pages. But why not MORE OF THEM? Efficiency is centered effort.

Boys' Farm Wagon

$4.98

This Big Farm Wagon will stand the hard usage which "Young America" gives a plaything of this character. The shafts are just the size for a big dog or goat. What fun the children can have riding behind Rover, the dog, or Billie, the goat. It is surprising what work can be done with this big, stout wagon.

This wagon is an exact reproduction of a regular farm wagon. Made expressly for us. Body is 18x36 in. over all; hardwood frame. Sides and ends can be taken off, leaving bed with stakes for hauling lumber, etc. The gearing is made like the gearing of a farm wagon, with bent hounds and adjustable reach. All parts are ironed and well braced. The front wheels, diameter, 14 in.; rear wheels, diameter, 20 in. Extra heavy hardwood shaved and staggered spokes. Have ½-in. Felloe; pressed steel hub caps and steel bushing inside hub; heavy welded ¾-inch tires, shrunk on and riveted. 9/16-inch steel axles. Stake fitted with rings and trimmed with band iron. It has pair of shafts and handle. Attractively painted in bright colors, gear in red with black stripings and box in dark green with yellow striping. It is without doubt the strongest and best boys' wagon on the market. Shipping weight, about 60 lbs.

MECCANO

Instructive, Entertaining, Educational

With Meccano any boy can build hundreds of working models on correct engineering principles. It is Engineering in Miniature. Structural, Mechanical and Electrical. The number of working models it makes is practically unlimited. The outfits contain nicely plated metal strips, accurate gear wheels, pulleys, rods, nuts and bolts, etc. Everything necessary is provided in each outfit, including tools and our 100-page illustrated manual giving complete instructions on how to build the different models. There is nothing further to buy. The parts are all standardized and interchangeable, and new parts and new outfits may be added at any time. The parts fit together, without straining or forcing. They are practically indestructible, and may be used over and over again. When you are tired of one model, take it to pieces and use the same parts to construct another different type of model. This is one of the best features of Meccano. You can make hundreds of toys with it, all working, each one different. All the time you are playing you are learning something that may prove very useful. You are learning how to build bridges, cranes, monoplanes, derricks, signals, wagons, cars, towers, swings, windmills, motor busses, trucks of different kinds, lighthouses and machinery of all kinds. Meccano teaches a boy to think. It teaches him patience. It teaches him thoroughness, because every model must be thoroughly and properly constructed, and fixed up solidly before it will work as it should. It teaches him to invent, because after he has made all the models shown in the book of instructions he can go on designing other models from his own ideas.

A few of the models you can make with Meccano

Read This Letter

After receiving a set of Meccano one of our customers writes us: "It is certainly the finest amusement for boys up to date. Can hardly tear my boy (as well as all the boys in the neighborhood) away from it long enough to eat and sleep."
